| Ensure their toys are safe in accordance with BD 131704-01                                                                                    | Yes          | Yes                            | Yes                            | Yes                                                 | Yes         |
| Draw up technical documentation and keep for 10 years                                                                                         | Yes          | Keep                           | Ensure it done by manufacturer | Yes                                                 | --          |
| Carry out conformity assessment procedures                                                                                                    | Yes          | --                             | Ensure it done by manufacturer | Carry out importer conformity assessment procedures | --          |
| Draw up manufacturer declaration of conformity and keep for 10 years                                                                          | Yes          | Keep                           | Ensure it done by manufacturer | --                                                  | --          |
| Affix GCTS mark on the toys                                                                                                                   | Yes          | Ensure it done by manufacturer | Ensure it done by manufacturer | Yes                                                 | Verify      |
| Ensure products remain conformity after series production                                                                                     | Yes          | --                             | --                             | --                                                  | --          |
| Carry out sample testing of market toys, keep register of complaints of non-conforming toys, recalls, keep distributors informed              | Yes          | Optional                       | Yes                            | Yes                                                 | --          |
| Ensure toys bear a type, batch, serial or model number                                                                                        | Yes          | Ensure it done by manufacturer | Ensure it done by manufacturer | --                                                  | Verify      |
| Indicate their name, registered trade name or trademark and address on the toys                                                               | Yes          | Ensure it done by manufacturer | Yes                            | Yes                                                 | Verify      |
| Ensure the toys accompanied by instructions and safety information in Arabic language                                                         | Yes          | Ensure it done by manufacturer | Yes                            | Yes                                                 | Verify      |
| Take corrective measures, withdraw or recall non-conformity toys                                                                              | Yes          | Yes                            | Yes                            | Yes                                                 | Yes         |
| Report to national authorities of member states about non-conformity toys                                                                     | Yes          | Yes                            | Yes                            | Yes                                                 | Yes         |
| Cooperate with national authorities to provide document related to conformity of toys in Arabic languages and any action taken at its request | Yes          | Yes                            | Yes                            | Yes                                                 | Yes         |
| Draw up importer declaration of conformity and keep for 10 years                                                                              | --           | --                             | Yes                            | Yes                                                 | --          |
| Ensure toy storage and transportation do not jeopardize its compliance                                                                        | --           | --                             | Yes                            | Yes                                                 | Yes         |

## 4. Conformity of Toys

In order to comply with this technical regulation, the toy shall:

- Comply with essential safety requirement
- With appropriate warning when necessary
- Conform to gulf toy standards
- Bear the appropriate GCTS mark.

## 5. Conformity Assessment Procedures

### 5.1 Manufacturer shall:

- a. Conduct safety assessment to the toys. Safety assessment is an analysis of the chemical, physical mechanical, electrical, flammability, hygiene and radioactivity hazard of the toy.
- b. Establish technical document that enable to assess the conformity of toy to relevant requirements. Document including:
  - i. Product specification
  - ii. Conceptual design, manufacturing drawings, materials, assemblies and circuits etc.
  - iii. Place of manufacturing and storage
  - iv. Gulf standards applied
  - v. Conformity procedures used and test reports
  - vi. Document relate to GC type examination where applicable
  - vii. Technical document shall keep for 10 years
- c. Apply for GC type examination from notified bodies where:
  - i. Toys non-conforming entirely to the Gulf standards
  - ii. Essential requirements not fully detailed in the Gulf standards
  - iii. GC type examination including:

- Notified bodies examine technical documentation for the adequacy of the toy design
  - Verify if the toy has been manufactured in conformity with GTTR
  - Carry out appropriate examination and tests according to Gulf standards or the appropriate solution adopted by manufacturers in order to meet the essential safety requirement
- d. Apply GCTS mark after carried out CAP according to GSO guidance document. Affix GCTS with QR code to demonstrate compliance and traceability.
- e. Issue manufacturer declaration of conformity. Format is shown overleaf.

### MANUFACTURER CONFORMITY DECLARATION OF TOYS

| Declaration of Conformity                                                                                                                                                        | الإقرار بالمطابقة                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. No (unique identification of the toy(s)) -----                                                                                                                                | 1. الرقم. (التعريف الوحيد للعبة أو اللعب)                                                                               |
| 2. Name and address of the manufacturer or his authorized representative: -----                                                                                                  | 2. اسم وعنوان الصانع أو ممثله الرسمي                                                                                    |
| 3. This declaration of conformity is issued under the sole responsibility of the manufacturer: -----                                                                             | 3. تم إصدار هذا الإقرار تحت المسؤولية الكاملة للصانع:                                                                   |
| 4. Object of the declaration (identification of toy allowing traceability). It shall include a colour image of sufficient clarity to enable the identification of the toy. ----- | 4. موضوع الإقرار (تعريف اللعبة مع توفير معطيات التتبعية). يجب إرفاق صورة بالألوان واضحة بما فيه الكفاية للتعريف باللعبة |
| 5. The object of the declaration described in point 4 is in conformity with the relevant Community harmonisation legislation: -----                                              | 5. موضوع الإقرار المبين في الفقرة 4 مطابق لمتطلبات اللوائح الفنية الخليجية:                                             |
| 6. References to the relevant standards used, or references to the specifications in relation to which conformity is declared: -----                                             | 6. مراجع المواصفات القياسية الخليجية، أو مراجع المتطلبات الفنية المستخدمة في الإقرار بالمطابقة.                         |
| 7. | 8. Additional information: -----                                                                                                                                                 | 8. معطيات إضافية:                                                                                                       |
| Signed for and on behalf of: -----                                                                                                                                               | موقع من طرف وبتفويض عن:                                                                                                 |
| (place and date of issue) -----                                                                                                                                                  | (مكان وتاريخ الإصدار)                                                                                                   |
| (name, function) -----                                                                                                                                                           | (الاسم، الوظيفة)                                                                                                        |
| (signature) -----                                                                                                                                                                | (التوقيع)                                                                                                               |

FIGURE 1 – Manufacturer Declaration of Conformity Format

## 5.2 Unlink Importers shall:

- Establish technical document that enable to prove the conformity of toy. A Technical document includes:
  - Description of the toy
  - Test reports and certificate
  - Document shall keep for 10 years
- Apply certification from notified body per consignment basis.
  - All the toys are individually examined to verify their conformity with the GTTR.
  - A random sample shall be taken from each consignment according to appropriate statistical conditions. The samples are examined to verify their conformity with GTTR
- Affix GCTS with QR code to demonstrate compliance and traceability
- Issue importer declaration of conformity as shown below:

### IMPORTER CONFORMITY DECLARATION OF TOYS

| Declaration of conformity                                                                                                                                       | الإقرار بالمطابقة                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. Name and address of the importer declaring compliance of the product: -----                                                                                  | 1. اسم وعنوان المصدّر الممثل عن إصدار الإقرار بمطابقة اللعب                                                             |
| 2. Identification of the toys covered by the declaration<br>Provide detailed determinant to identify all items covered by this declaration and no others. ----- | 2. تعريف اللعب المشمولة بالإقرار<br>يجب توفير أرقام التعريف الكافية لتحديد كل اللعب المشمولة بالإقرار وتمييزها عن غيرها |
| 3. References to the gulf product safety regulations and relevant standards to which conformity is declared. -----                                              | 3. مراجع اللوائح الفنية الخليجية والمواصفات القياسية الخليجية التي يُشهد بالمطابقة معها                                 |
| 4. This declaration of conformity is issued under the sole responsibility of the Importer. -----                                                                | 4. أصدرت هذه الشهادة تحت المسؤولية الكاملة للمصدّر.                                                                     |
| 5. Toys described in point 2 are in conformity with the gulf product safety regulations and the relevant standards referred to in point 3 -----                 | 5. اللعب المبينة في الفقرة 2 مطابقة مع اللوائح الفنية الخليجية والمواصفات القياسية الخليجية المشار إليها في الفقرة 3    |
| 6. The notified body on whose Conformity Assessment Procedure (CAP) the certificate depends: name & number, description of CAP, & certificate issued -----      | 6. اسم الجهة المقبولة المتدخل (إذا لزم) ورقمها، تحديد إجراءات تقويم المطابقة المنجزة، والشهادة الصادرة عنها.            |
| 7. Additional information: -----                                                                                                                                | 7. معطيات إضافية:                                                                                                       |
| Signed for and on behalf of: -----                                                                                                                              | موقع من طرف وبتفويض عن:                                                                                                 |
| (place and date of issue) -----                                                                                                                                 | (مكان وتاريخ الإصدار)                                                                                                   |
| (name, function) -----                                                                                                                                          | (الاسم، الوظيفة)                                                                                                        |
| (signature) -----                                                                                                                                               | (التوقيع)                                                                                                               |

FIGURE 2 – Importer Conformity Declaration of Toys

## B. GSO Conformity Tracking Symbol (GCTS)

1. The GCTS is a symbol granted by GSO representing the Gulf Conformity Marking. It shall be affix on all products in accordance with the conformity assessment procedures by notified bodies.
2. Notified bodies are also responsible to register all products subjected to conformity assessment procedures to the GSO certificate tracking system.
3. The general procedures for applying the GCTS are as below:
  - a. Manufacturers/importers apply to NB for toys subjected to conformity assessment involving NB.
  - b. NB (notified bodies) conduct assessment and register
  - c. GSO generates the marking. NB download from GCTS and affix on first page of the certificate.
  - d. GCTS shall be display in appropriate form, size, proportion and color.
  - e. GCTS shall be easily visible, readable and permanent and readable by scanner of smartphone

- f. GCTS shall affix on the product in the following way.

- g. Where it is not possible, for example product too small, then apply the following mark on product.

- h. Where it is not possible, the GCTS shall be apply to the outer packaging and manual.
- i. GCTS shall be in black and white or in the following color.

## C. GSO guidance on conformity Assessment for GTTR

Refer to: Guidance Document on Conformity Assessment for GCC Technical Regulation on Children Toys Version 2.1 : 25/06/2020 and 2020/03/25

**The implementation of the technical regulation (TR) has not yet fully achieved its targets due to a variety of factors including some of the following:**

1. Insufficient evidence on the correct implementation of Conformity Assessment Procedures (CAPs) according to the (TR).
2. Lack of imports data, and technical reviews by Customs Authorities on toys imports.
3. Difficulties faced by importers on CAPs, and unbalanced implementation of the type approval by manufacturers.
4. Ambiguities in the wording of the CAPs, particularly in Annex IV of the TR, leading to variations in quotations and testing requirements among Notified Bodies (NBs).

Hence, this guidance document was issued under request of the Gulf Committee on Conformity Assessment (GCCA), aiming to clarify ambiguities and offer clear alternatives for consistent implementation of CAPs requirements according to the GSO Children Toys TR.

### a. Conformity Assessment Procedures

#### i. General Principles

1. Safety requirements for toys are defined in Annex II of the GSO TR and must be complied with and attested under manufacturer or importer responsibility.
2. GSO works to avoid imposing unnecessary burden on economic operators and favoring risk-based approach to do so, while maintaining the necessary level of product safety for the intended target group of consumers (children aged 0-14). For this purpose, a list of mandatory tests will be maintained and updated periodically.
3. Considering the capabilities and demonstrated competencies by specific economic operators, accredited test reports generated under responsibility of manufacturers can be considered as evidence of conformity

4. However, considering the technical safety requirements of the technical regulation and the heterogeneity of active economic operators marketing products in the GSO member states market, intervention of Notified Body is considered necessary to ensure sufficient evidence on correct application of the required CAPs is provided in all cases, and to allow for full traceability of products using the existing GSO Conformity Tracking System (GCTS) scheme.

## ii. Toys Categorization for CAP and Testing

1. The conformity assessment procedure for manufacturer and importer is to be performed with view of ensuring that all traceability data are provided on relevant implementation of responsibilities for affixing the Gulf Conformity marking, particularly that the appropriate procedure will be carried out to assess the conformity with the required level of intervention by the Notified Bodies.

## iii. Manufacturer CAP

1. Manufacturer conducts risk assessment, or have it conducted, and identifies significant aspects of risks in toys;
2. Manufacturer prepares the technical documentation according to the technical regulation (BD-131704-01) Annex (IV) including:
  - a. List of risks and hazards in the toy and the listing of applied Gulf standards the toy complies with according to the risk analysis according to point (a),
  - b. Bill of Materials,
  - c. The necessary test reports for significant risks identified,
  - d. A description of the procedures followed by the manufacturer to ensure the efficiency of factory production control to achieve the conformity of the manufactured toys with the design specified in the technical documents;
  - e. A declaration regarding the conformity of the products.
3. The Manufacturer shall send the above listed technical documents to one NB of his choice for review and final approval. Whenever required, the NB can arrange necessary grouping, testing (fully or partially or on representative items) or technical assessment for the manufacturers.

### Criteria of grouping:

- a. Same HS code,
- b. Similar age range,
- c. Same manufacturer (same supplier). Same manufacturer may sell same toy using different brand names. This also can be grouped,
- d. Same country,
- e. Similar function and material.
- f. There is no limit for the number of SKU if they meet above criteria.

## Representative tests:

At least 1 SKU and a maximum 6 of the SKUs falling under the same group while 5% to 10% of the SKU in all cases. Test reports have to cover relevant hazards for toys categories.

New products can be added to an existing group if they fulfil the criteria for that group.

4. On completion of step (3) the NB shall issue a Gulf Conformity Certificate (GC-Certificate) for manufacturer and approve the products in accordance with the requirements of the GCTS.

5. Manufacturer (who is responsible for the procedure) shall affix the GCTS according to the rules of the GSO.

#### iv. Procedure for unlink importer

1. This procedure is to be performed for homogenous consignments.

2. Importer shall apply to a NB of his choice to perform the statistical sampling and the necessary tests and examinations to assess conformity of the toys with the safety requirements of the GSO TR.

3. Acceptable level of sampling of each consignment is to be done, and relevant program of inspection and suitable tests on specimens of products are to be performed by the NB to ensure compliance, taking into consideration any available test reports or evidence of conformity (e.g. national certification mark) presented by the importer.

4. On verification of the conformity of the toys the NB shall issue a Gulf Conformity Certificate (GC-Certificate) for importer and approve the products in accordance with the requirements of the GCTS.

5. Importer shall affix the GCTS for each consignment according to the rules of the GSO, and the GCTS fees will be applicable once a year as per the Board of Directors decision.

#### v. Applicable standards and responsibility

1. The following international standards (series) are adopted by the GSO and shall be applied in the preferential order as shown below:

- a. GSO EN 71 set, EN 71 set is accepted;
  - b. IEC 62115, EN 62115 will require an additional gap analysis against GTTR essential requirement;
  - c. ISO 8124-series, additional tests may be required;
  - d. ASTM F963, additional tests may be required;
2. Adopt the updated version of standards. When new standard published, GSO can accept a grace period of 2 years after the publish date.
  3. Test reports generally shall be considered valid evidence if they clearly relate to the applied products and those reports bear the endorsement logo of a reputable accreditation body being a member of the ILAC multilateral agreement and are not older than 3 years since its date of issue;
  4. Whenever the NB has concerns as to the validity or authenticity of a test report presented by the manufacturer or importer, necessary additional testing may be arranged by the NB in agreement with the manufacturer.
  5. Mandatory standards refer to Toys categorization-20210709.

## D. Conformity Assessment Bodies

### 1. Notified Bodies

1.1 If the conformity Assessment procedure of the toy is carried out by a third-party body the latter must be notified in accordance with the gulf technical regulation related to the notification of the conformity assessment bodies

1.2 The Member States shall notify the Organization of the conformity assessment bodies that have been appointed by them as a notified body.

1.3 Notified bodies shall perform conformity assessment activities necessary to prove that a product submitted by a manufacturer or his representative fulfils all essential requirements of the applicable Gulf Technical Regulation(s) whenever one or more Gulf Technical Regulations require a third party's intervention or upon request of the manufacturer or his representative, and shall award Conformity Markings to products.

Example of such activities are GC type examination, GCTS registration, shipment certification of unlinked importers.

### 2. Conformity Assessment Body

2.1. Conformity Assessment Body means a body that performs conformity assessment activities, including calibration, testing, certification and inspection.

2.2. It shall be accredited in accordance with the Gulf technical regulations related to accreditation by the Gulf Accreditation Center or any accreditation body recognized under applicable international agreements.

Examples of such accreditation are, HOKLAS, CNAS, UKAS etc.

## E. Gulf Standards and Relevant International Standards

1. According to GTTR, toys which are in conformity with Gulf standards or parts thereof shall be presumed to be in conformity with the requirements covered by those standards or the essential safety requirements as set out in the technical regulation.
2. Gulf standards and other relevant toy standards are listed as below. With reference to GSO document 20210709

| Standard Reference Number | Standard Title                                           | Apply condition                                                                    |
|---------------------------|----------------------------------------------------------|------------------------------------------------------------------------------------|
| GSO EN 71-1               | Mechanical and physical properties                       |                                                                                    |
| GSO EN 71-2               | Flammability                                             |                                                                                    |
| GSO EN 71-3               | Migration of certain elements                            |                                                                                    |
| GSO EN 71-4               | Experimental sets                                        |                                                                                    |
| GSO EN 71-5               | Chemical toys                                            |                                                                                    |
| GSO EN 71-7               | Finger paint                                             |                                                                                    |
| GSO EN 71-8               | Activity toys for indoor and outdoor                     |                                                                                    |
| GSO EN 71-9               | Organic chemical compounds                               | If in scope                                                                        |
| EN 71-12                  | Nitrosamines and nitrosatable substances                 |                                                                                    |
| EN 71-13                  | Olfactory board games, cosmetic kits and gustative games |                                                                                    |
| EN 71-14                  | Trampolines for domestic use                             |                                                                                    |
| IEC 62115 2017            | Electrical toys                                          |                                                                                    |
| EN 62115                  | Electrical toys                                          | Gap analysis required to assess against essential safety requirement of BD 131704. |

| Standard Reference Number | Standard Title                                                             | Apply condition                                                                    |

- Adoption by endorsement for the latest version of national/international standard and the previous adopted edition remains effective for 2 years starting from the date of publishing of updated standards.
3. According to GSO guidance, where there are no related Gulf standards, the most updated EN harmonized standard can be applied.
4. Where manufacturers determine to apply GSO ASTM F963 or GSO ISO 8124-3 for the compliance assessment, due to their coverage of heavy metal requirement are less than GSO EN71-3, manufacturers shall either attest the products on the variation area or go for GC type examination by notified bodies to ensure the compliance of the products.

## **3 Chapter Three**

# **Classification of Toys**

# Classification of Toys

## A. Children's Product

### 1. Definition of Children's Products

A consumer product designed or intended primarily for children.

### 2. To determine whether the product is a children product, the following factors are considered;

- A statement by a manufacturer about the intended use of such product, including a label on such product if such statement is reasonable.
- Whether the product is represented in its packaging, display, promotion, or advertising as appropriate for use by children.
- Whether the product is commonly recognized by consumers as being intended for use by a child.
- The Age Determination.

### 3. Statements/Claims of manufacturer about the intended age can be reference if:

- It is reasonable
- It is consistent with the expect use pattern
- It is not contradicting with the primary appeal
- It is not contradicting with primary intend

#### Statement/Claims of Manufacturer for Children's Product

#### Example

#### Children's Product?

- Clear indication of intended user age

Yes

Not reasonable statement: This is an R/C car set with simple remote function.

- The age label is not consistent with usage. It is too simple to operate and clearly suitable for children

No

For over 14 years

Not reasonable statement: This is a big model set to build railway model

- Not consistent with expected use pattern. This is too big and too complicated for children. This should be adult hobby item

No

For age over 3

Not reasonable statement: This is a stuffed bear for Valentine

- The primary appeal is suitable for children of all ages

Yes

For over 14 years

4. Whether the product is represented in its packaging, display, promotion, or advertising as appropriate for use by children

| Advertising                                                                                   | Example                                                                              | Children's Product? |
|-----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------|
| Packaging image indicate it is children product<br>• With child appealing graphic             |     | Yes                 |
| Packaging image<br>• Clearly indicate user is children                                        |     | Yes                 |
| Location of sell. In a toy shop<br>• Location of selling is a factor, but not critical factor |  | --                  |

5. Whether the product is commonly recognized by consumers as being intended for use by a child

- Whether consumer perception of product a being used by children depends on;
- Any specific feature that usually found in children product?
- Whether the cost is reasonable for children use?
- Whether the product has interaction with children?

#### Advertising

#### Example

#### Children's Product?

Animal Feature at Chair

Cartoon Printing on Hanger

Cartoon Printing on Hange

Safety Scissor

Special features that usually found in children's products

Yes

| Advertising                                                                                                                                                                                                                                | Example                                                                                                                                                                                                                         | Children's Product? |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <p>Cost</p> <ul style="list-style-type: none"> <li>• Children products may not be very expensive</li> </ul>                                                                                                                                |  <p>Expensive Die Cast Model</p>  <p>Jewelry Necklace</p> | No                  |
| <p>No interaction with children</p> <ul style="list-style-type: none"> <li>• Baby monitor place near crib but the purpose is for parent monitoring children</li> <li>• There is no interaction between children and the product</li> </ul> |  <p>Big R/C Plane</p>  <p>Baby Monitor</p>              | No                  |

#### Children's Product?

No

Yes

## B. Toy

### 1. Toy Definitions

- An object used in play.
- Toys to encourage play, stimulate imagination, amuse a child.
- A children product for age below 14 years and that has play value.
- A product or material designed or clearly intended for use in play by children of less than 14 years of age.

### 2. Play

- Intrinsically motivated activities that are normally associated with pleasure and enjoyment
- Play is self-choose and self-directed

### 3. Play value

- Feature attractive to children that promote interactive exploration and imagination
- Action performed for entertainment and amusement
- When they are fun and engaging, playthings are said to have play value

### 4. The playing value is introduced in an intended way by the manufacturer.

### Attractive to children does not of itself cause a product to be a toy

| Play Value?                                                                                                                                                  | Toy                                                                                                              | Non-Toy                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Children have interaction with the disc with the hand held game. But, no interaction with the DVD. They just watch TV movie.                                 | <br>Game book with a disc     | <br>DVD                                           |
| The construction playing is self-directed and entertains. The science model used in school is only knowledge teaching. Not self-direct to get entertainment. | <br>Magnetic construction toy | <br>Science model making molecule use in teaching |

| Play Value?                                                                                                                                                                             | Toy                                                                                                                                      | Non-Toy                                                                                                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| Book with sensory element or other play feature that promote interaction. In handbag shape also enhance imagination play. Story book is just for learning.                              | <br>Book with plush feature and book made like hand bag | <br>Story reading book              |
| An eraser that can be a puzzle can promote imagination, exploration and also entertain. Butterfly eraser is only a children's product without play value.                               | <br>Eraser that at the same time a 3D puzzle           | <br>Eraser with butterfly printing |
| Play costume promote imagination and dress to pretend play for entertainment. Fashion apparel dress has no play value.                                                                  | <br>Dress costume to imitate hero                     | <br>Fashion apparel for children  |
| Children shoes in stuffed animal appearance can promote imaginary when wearing. That is for entertainment. The fish can be played as soft toy. While the shoes is just for general use. | <br>Foot wear in a fish character and with stuffing.  | <br>Sport shoes                   |
| Eating utensil with play feature added. They are engaging and fun and entertaining. Pure eating utensil is just for general use without play value                                      | <br>Eating utensils with vehicle features added       | <br>Eating utensils               |

| Play Value?                                                                                                                                                                                                                                        | Toy                                                                                                                        | Non-Toy                                                                                                              |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Children toilet pot like a boat with additional steering feature. This enhances imaginary and can be pretend as riding for fun. The common children toilet pot has no play value.                                                                  | <br>Pot with steering wheel feature added | <br>Children pot                  |
| Jewelry set made of plastic and children putting bead on string to make their imitate jewelry. This promote interaction, imagination and for entertaining. Fashion jewelry is only for decoration and no interaction and not promotes imagination. | <br>Plastic jewelry set                  | <br>Fashion jewelry wear on head |
| Toy in shape of milk bottle and a real milk bottle.<br>Toy milk bottle is use for playing while the real milk bottle is feeding utensil only                                                                                                       | <br>Toy milk bottle with candy inside   | <br>Real milk bottle            |

## C. General Use Products and Adult Hobby/Collecting Products

### 1. General Use Product

Product that is not intend primary for a specific age and not fall into children product and toy is consider general use product.

### 2. Adult hobby/collecting product

- Products that are intend primary for adult or over 14 years of age.
- Below factors can be useful to determine an adult hobby and collective product.

**i. Manufacturer's intend**

- Labelling: Clear labelling of the intended user group; example "For adult collectors".
- Consistence of the descriptive material and graphic of packaging to the intended users

**ii. Marketing**

- Packaging image: more professional, adult attractive
- Any established product line for adult.
- Where to sell: would it separate from children toys?
- Pricing: generally more expensive compare with children toys.

**iii. Appearance and features**

- Higher level of detail
- High reality, fine features
- Higher complexity
- More professional
- Complicated assembly
- With extend additional components
- High quality/prestige

**iv. Mode of use/Skill level/performance**

- Competitive/team play. For example war game
- Higher skill level to operate
- High performance of the product
- Speed, accurate, sensitivity, force, function

**v. Size/weight/material**

- Size/weight fit for adult. Refer to body size and physical capability
- Fine/fragile material; example ceramic, resin

Packaging image is more professional, informative.

Appearance: high level of detail, fine featured

High complexity and with extend component for collectors

Professional. Some requires special site for playing

High skill level required. Product with high performance.

Competitive use mode. Example, war game product. Competition product.

Adult size.

Fine, fragile material. Example resin, ceramic.

## D. Age Grading

### 1. Purpose of Age Grading Determination

- a. Age grading determination is important in toy safety evaluation
- b. An inappropriate age grade could result in inappropriate testing and incorrect conclusions on the conformity of the toy.
- c. A suitable age determination is needed before any testing or safety assessment begins.

### 2. Age Grading Determination

- a. Various characteristics and functions of a toy are matched to the characteristics of children of different stage of development to determine whether it is appropriate for such stage/age
- b. Following factors are to be considered during age grading determination
  - Size, weight, Number (ease of handling)
  - Color
  - Theme
  - Degree of realism
  - Function – audio, visual effect
  - Skill level
  - Packaging, advertising and marking
  - Location of sale

### 3. Concept used to determine age

- a. Two major area of development
  - Mental/cognitive development
  - Physical development (Gross/fine motor skill)
- b. Cognitive development
  - Jean Piaget's stage of cognitive development
  - EU classification of age CR 14379 mainly developed based on this theory
  - ISO 8124-8 are also refer to part of this theory
- c. Jean Piaget's 4 stages of intellectual growth in the following orders
  - i. Sensorimotor stage – 0 to 2 years
    - Infant learn by coordinate their sensory input and motor capability. The child has to use its senses to see, hear, taste and feel in order to learn.

## ii. Preoperational stage – 2 to 7 years

- Children start to think more systematically. They can use language and symbol to represent things. Their thinking still intuitive and egocentric.

## iii. Concrete operational stage – 7 to 11 years

- The reasoning of children develop towards logic and systematic. Children quickly acquire cognitive operation and apply these new skills when thinking about objects and events that they have experienced.

## iv. Formal operational stage – 11 to 12 years and beyond

- Children begin to think more rationally and systematically about abstract concepts and hypothetical events

Below is the table shows the relationship between cognitive and physical development of children in relation to suitable toys for them.

| Cognitive Development                                                                                                                                                                                                                                                                                                                     | Physical Development                                                                                                                                                                                                                                                                                                                                       | Likes and Needs                                                                                                                         | Example of Suitable Toys                                                                                                                                                    |

## Document that are useful in age grading determination

### a. United States

- CPSC Age Determination Guidelines 2020

### b. European Union

- CR 14379 Classification of toys – Guidelines and available official guidance documents on the application of the directive on safety of toys EN 13387

### c. International

- ISO/TR 8124-8 Age determination guidelines

## 6. How to use the document to help determine the age grade

**Example 1: Length of the shoes ~ 18 cm, Width of the shoes ~ 7 cm****Cognitive Development  
Theory**

Pretend/social play: pretending to be someone else, appear around 2.5 year and increase rapidly 4 to 5

**Classification of Toys  
CR14379****Table 8 – Costumes, disguises and masks (intended to imitate)  
(Category G)**

|                               | < 36 months                            | ≥ 36 months                            |
|-------------------------------|----------------------------------------|----------------------------------------|
| Functions and characteristics | To fit the size of a child < 36 months | To fit the size of a child ≥ 36 months |
| Examples                      |                                        | Accessories, like a sword, gun         |

**CPSC Age Determination  
Guidelines****3 Years**

Three-year-olds look forward to pretending with costumes, accessories, and kits of moderately realistic detail in either rich, vibrant colors or pastel colors. They enjoy costumes and dress-up materials. Jewelry, such as bracelets, necklaces, rings and earrings, appeal when they have a moderate level of realistic detail in form and function.

**ISO/TR 8124-8 Age  
Determination Guidelines**

|       |     |                                                                                                                                                                    |
|-------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5.2.1 | 2 y | Costumes, dress up clothing and accessories imitating characters of legends and tales – costumes sized to children with accessories such as masks, helmets, swords |
|-------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Example 1: Length of the shoes ~ 18 cm, Width of the shoes ~ 7 cm

Classification of Toys CR14379

EU Guidance Document No.1

## II DOLLS

Dolls can resemble a baby, a child, an adolescent or an adult and be both male and female. Dolls account for a very broad and diverse segment of the toy market, reflecting their design, level of realism and, in some cases, their accompanying accessories.

### 4.5. Dolls sold alone

Determining factors used to confirm the suitability of the products for children under 3 years old:

- simple design;
- flexible, soft, smooth, cuddly products which resemble babies or little children;
- made entirely from padded fabric (example 1-3);
- bodies made completely from padded fabric, but with head and limbs made from rubber or PVC, or even totally made from rubber or PVC (example 4-6);
- head and limbs which can be moved only very slightly;
- simple actions which make the doll move, cry or talk (pulling a cord, pressing a button, etc.);
- with little or no interaction.

Non-determining factors:

- hair, made from wool or imitation hair;
- eyes which close.

### 4.6. Baby dolls and dolls sold with associated features

#### 4.6.1. Boxes should be designed for children under 3 years old

In addition to the doll with the features mentioned above, the box may include:

- non-removable clothes which the doll is already wearing;
- clothes which are easy to put on and take off, do not need adjustment, and are already worn by the doll or included as spare clothes;
- objects which are associated with children under 3 years old and which reflect their capabilities (potty, bib, plate, spoon, etc).

#### 4.6.2. Boxes not intended for children under 3 years old but contain a doll suitable to this age group

If the doll meets the requirement from point 4.6.1, it should be suitable for children under 3 years old. Children under 3 years old should only be barred from access to the toy on

## Example 2: Doll

CPSC Age Determination  
Guidelines

## 2 Years

Children in this age group increasingly recognize the symbolic connections between toys and the real world, and start to pretend more often than younger children. This pretend play also occurs in more complex ways. These children have a low to moderate degree of fine-motor dexterity and control, and can handle slightly larger (12 to 18 inches) and heavier (8 to 16 ounces) dolls and stuffed toys. These toys may have a small number (about two to four) of familiar accessories such as a bottle, blanket, or bone. Characteristics such as these are important for these children to initiate pretend episodes and to practice being friends or caring partners. As these children approach 3 years of age, dolls become more appealing when they have a low to moderate level of realistic details in their facial features, hair, clothing, and accessories. This is especially true for baby dolls. Children of this age also begin to appreciate eyes that move, like baby dolls that sleep and awake.

ISO/TR 8124-8 Age Determination  
Guidelines

|        |                                                                                                                                                                                                                                                                                                                                              |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18 mo+ | <b>Dolls for imitating care activities (bathing and feeding)</b> – simple dolls imitating babies, without hair or with moulded hair, with painted eyes and without articulated arms and legs                                                                                                                                                 |
| 2 y+   | <b>Lightweight dressed dolls, and dolls to dress (excluding fashion dolls)</b> – moving eyes, articulated arms and legs, rooted hair similar to real hair, animated activities, such as crying, bodily functions, smiling, or talking, with easy to dress clothing and accessories for imitating familiar activities (bottle, blanket, etc.) |

Judgement: Appropriate for children ages over 2 years

#### 7. Summary of different categories of toys regarding age grade (reference to ISO 8124-8)

##### Birth to under 4 months

##### 4 months to 8 months

##### 8 months to 12 months

##### 12 months to 18 months

##### 18 months to 24 months

#### 24 months to 36 months

#### 3 years to 4 years

#### 4 years to 6 years

#### 6 years to 8 years

#### 8 years to 14 years

## Hazard

## Summary Requirements

### GSO EN71-1 Physical and Mechanical Properties

- Toys intended for children under 36 months shall not present small parts.

- Toy magnets for children under 36 months, shall not as small parts even the magnetic flux index less than 50kG2mm2.

- Soft-filled toys. a) After tension test, shall not permit to insert the front part of probe A through any opening in the seam. May be accepted if it clearly does not create a hazard. b) Containing fibrous filling material, after tension test, shall not permit to insert a 12mm rod more than 6 mm in any opening of the seam.

- Mouth-actuated toys shall not as small part.

- Balloon made of latex shall carry warning.
- Small ball shall carry a warning. (Not apply to soft-filled balls).

Choking

| Hazard     | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Hazard

## Summary Requirements

### GSO EN71-1 Physical and Mechanical Properties

- For children under 36 months, shall not exhibit sharp points. Functional sharp points, may be used in toys intended for children 36 months and over, drawn to the attention of the user is need. Metallic wires designed or likely to be bent, shall not break and produce sharp point. Splinter shall not present unreasonable risk.

Puncture /  
Penetration

- Protruding parts. Tubes and rigid components in the form of projections shall be protected. The ends of spokes on toy umbrellas shall be protected.

## Hazard

## Summary Requirements

### GSO EN71-1 Physical and Mechanical Properties

#### Parts moving against each other

##### 1. Folding and sliding mechanisms

- Toy pushchairs and perambulators incorporation a handle or other structural member which can fold down over a child, shall have at least one main locking device and at least one secondary locking device.
- Toy pushchairs and perambulators that do not otherwise constitute a hazard of a handle or other structural member folding down over a child, shall have at least a locking device or a safety stop.

- Folding devices on other collapsible toys which may have a scissor-like action, shall have a safety stop or locking device and safety clearance.

- Toys other than above, shall have safety clearance.

##### 2. Driving mechanisms

- Shall be enclosed.
- The shape and dimensions of winder keys or starting handles shall have safety clearance and holes.

Crushing /  
Pinching

| Hazard                 | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Hazard

## Summary Requirements

## GSO EN71-1 Physical and Mechanical Properties

- Aquatic toys and inflatable toys shall have inlets with stoppers permanently attached to the toy. If detach, shall not as small part. Stopper shall not protrude more than 5mm. Warning is need. (Inflatable aquatic ride-on toys larger than 1.2m, shall fulfil with Class A2 devices in EN 15649-3).

- Hemispheric-shaped toys with inner dimension of 64mm ~ 102mm, volume less than 177ml, and depth greater than 13mm. Shall:
  - Have at least two openings, minimum dimension of 2mm, which are at least 13mm from the rim; or
  - Interrupted at the centre by some type of divider that extends 6mm or less from the plane of opening; or
  - Have three openings, located between 6mm and 13mm from the rim and at least 100° apart; or
  - Have a repeated scalloped-edge pattern around the entire rim.

- Packaging. Plastic sheeting and bags made of flexible plastic, shall have thickness of 0.038mm or more. Bags made of flexible plastic with opening greater than 380mm, shall not have a drawstring or cord.

Suffocation /  
Asphyxiation

### GSO EN71-1 Physical and Mechanical Properties

- To take into account the fact that the effective time of sound emission from a toy under use can vary considerably, toys designed to emit sound are divided into 3 exposure categories:

| Exposure Category 1                                                                                      | Exposure Category 2                                                                                                                           | Exposure Category 3                                                                                                       |
|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Toys emitting sound during time periods typically longer than 30s after each initiation                  | Toys emitting sound during time periods typically shorter than 30s but longer than 5s after each initiation                                   | Toys emitting sound during time periods typically shorter than 5s after each initiation                                   |
| Close-to-the-ear toys emitting sound during time periods typically longer than 30s after each initiation | Close-to-the-ear toys that, while emitting sound, are held close to the ear during time periods typically shorter than 30s but longer than 5s | Close-to-the-ear toys that, while emitting sound, are held close to the ear during time periods typically shorter than 5s |
| Toys using headphones or earphones                                                                       | /                                                                                                                                             | /                                                                                                                         |
| /                                                                                                        | Rattles and squeeze toys                                                                                                                      | /                                                                                                                         |
| /                                                                                                        | /                                                                                                                                             | Toys for which maintaining the sound output requires significant physical effort                                          |
| /                                                                                                        | /                                                                                                                                             | ألعاب إطلاق النار                                                                                                         |
| /                                                                                                        | Wind toys which are imitations of musical instruments                                                                                         | Wind toys such as whistles                                                                                                |
| Other toys emitting sound typically during more than 1/3 of the playing time                             | Other toys emitting sound typically during less than 1/3 and more than 1/10 of the playing time                                               | Other toys emitting sound typically during less than 1/10 of the playing time                                             |

| Pull-along or push toys                  | 80 dBA *2           | 85 dBA *2           | 90 dBA *2           | 110 dBC   |
| Percussion toys                          | /                   | 85 dBA              | /                   | 130 dBC*3 |
| Wind toys                                | /                   | 85 dBA              | 90 dBA              | 110 dBC   |
| Cap-firing toys                          | /                   | /                   | 90 dBA              | 125 dBC*4 |
| Voice toys                               | 80 dBA              | 85 dBA              | 90 dBA              | 110 dBC   |

\*1: Measured using an ear simulator device and converted to a free field equivalent.

\*2: This limit value refers to the A-weighted maximum emission sound pressure level using time-weighting F, LpAFmax.

\*3: If the C-weighted peak emission sounds pressure level, LpC peak, produced by a percussion toy exceeds 110 dB, the potential danger to hearing shall be drawn to the attention of the user by a warning.

\*4: Where the C-weighted peak emission sound pressure level, LpC peak, produced by a cap-firing toy exceeds 110 dB, the potential danger to hearing shall be drawn to the attention of the user by a warning.

Hearing Damage

| Hazard                 | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Electric strength voltage 250V having a frequency of 50 Hz or 60 Hz for 1 min</li> <li>• Electric toys intended to be used in water, electric toys used with liquid and filled from a tap and electric toys likely to be cleaned with liquid shall have an enclosure providing the appropriate protection.</li> <li>• The enclosures shall have adequate mechanical strength. After three blows are applied to every point of the enclosure that is likely to be weak with impact energy of 0.5 J, no damaged extent that compliance with this standard is impaired.</li> <li>• The nominal supply voltage shall not exceed 24V; the working voltage between any two accessible parts of the toy shall not exceed 24 V.</li> </ul> |

| Hazard     | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Electrical | GSO IEC 62115 Electrical Safety                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|            | <p>in the toy and the insulation between such parts and accessible parts shall have a thickness of at least 1 mm and an adequate electric strength (1500 V having a frequency of 50 Hz or 60 Hz for 1 min).</p> <ul style="list-style-type: none"> <li>• Wire ways shall be smooth and free from sharp edges. Cords and wires shall be protected so that they do not come into contact with moving parts, burrs, cooling fins or similar edges that may cause damage to their insulation. Bare wiring and heating elements shall be rigid and fixed.</li> <li>• The components used in the toy shall comply with the safety requirements specified in the relevant IEC standards as far as they reasonably apply.</li> <li>• Switches and automatic controls carrying a current exceeding 3 A during the tests of normal operation test and Normal operation with insulation short-circuited shall comply specific endurance test or IEC 61058-1 or IEC 60730-1.</li> <li>• The Toys shall not be fitted with thermal cut-outs that can be reset by a soldering operation and mercury switches.</li> <li>• Linear type transformers for toys shall comply with IEC 61558-2-7, switch mode type transformers shall comply with IEC 61558-2-7 and IEC 61558-2-16.</li> <li>• Battery chargers supplied with the toy shall comply with IEC 60335-2-29, if the battery chargers for use by children, they shall comply with annex AA also.</li> <li>• Screws used for fixings shall not be made of metal that is soft or liable to creep, such as zinc or aluminum. Screws used for fixings made of insulating material shall have a nominal diameter of at least 3 mm and shall not be used for any electrical connection.</li> <li>• Screws used for electrical connections shall screw into metal.</li> <li>• Clearances and creepage distances of functional insulation shall not be less than 0,5 mm ( the distance may be reduced to 0,2 mm provided that the microenvironment is unlikely to exceed pollution degree 2), but for computer toys, both creepage and clearance distances between accessible parts and conductive parts shall be at least 1,5 mm.</li> </ul> |

| Hazard                                 | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Hazard

## Summary Requirements

## GSO IEC 62115 Electrical Safety

o 0,32 Wsr-1 or 8 Wm-2 when assessed at 200 mm for accessible emissions with wavelengths of  $1\ 000\ \text{nm} \leq \lambda < 3\ 000\ \text{nm}$  (FIR).

- Toys with an integrated field source generating Electromagnetic Fields (EMF) shall comply with EN 62233:2008.
  - o Exception: Toys without a motor, inductor or which only include passive electronic components or the toys consuming a current of 3 A or less.

## Electrical

- Remote controls for electric ride-on toys

In the event that wireless communication between the transmitter and the receiver is cut-off, the electric ride-on toy shall stop automatically.

In any event of a system failure or malfunction that prevents the adult's ability to control the electric ride-on toy, the electric ride-on toy will stop by default.

| Hazard                                 | Summary Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Hazard

## Summary Requirements

### GSO EN 71-3 Migration Test

- Example:
  - o Bubble solution
  - o Poster paints
  - o Finger paints
  - o Liquid adhesives
  - o Glue sticks
  - o Slimes

### Category III: Scraped-off toy materials

- Solid toy material with or without a coating which can be ingested as a result of biting, tooth scraping, sucking or licking

- Example:
  - o Surface coating
  - o Plastic
  - o Wood
  - o Textiles
  - o Glass
  - o Ceramic
  - o Metal
  - o Materials which are not defined as Category I or II material

| NOTE:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                           |                     |
| 1 Great care is required in using this measure because it is not a good indicator of the risk posed. A TAMC value over 1000 cfu/g or ml shall not necessarily be regarded as a non-compliance and should be reviewed on a case by case basis taking into account the nature of the material and the way it is used in a toy. It is advised to retest values over 1000 cfu/g or ml after storage for 7 days at room temperature. If the second test is decreasing (at least 1 log) with reference to the first test result, the TAMC value can be considered as immaterial. Samples with TAMC over 100 000 cfu/g or ml should be regarded as non-compliant in general. |                                                                                                                                                                           |                     |
| 2 Guidelines should not be taken alone to prove that the product is unsafe or non-compliant. Further work may be necessary to establish whether sufficient preservation was used and its effectiveness'                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                           |                     |

## 7 Chapter Seven

# Labelling of Toys

# Labelling of Toys

## A. Mandatory Labelling according to GTTR

According to Conformity Assessment Regulation Children Toys BD131704-01, Article (11):  
Warnings:

1. Toys shall not bear one or more of the specific warnings where that warning conflicts with the intended use of the toy, as determined by virtue of its function, dimension and characteristics.
2. The manufacturer shall mark in Arabic language the warnings in a clearly visible, easily legible and understandable and accurate manner on the toy, on an affixed label or on the packaging and, if appropriate, on the instructions for use which accompany the toy. Small toys which are sold without packaging shall have appropriate warnings affixed to them.

3. The warnings shall be preceded by the words «Warning» or «Warnings», as the case may be.
4. Warnings which determine the decision to purchase the toy, such as those specifying the minimum and maximum ages for users and the other applicable warnings set out in Annex III, shall appear on the consumer packaging or be otherwise clearly visible to the consumer before the purchase, including in cases where the purchase is made on-line.

#### **Part A: GTTR General Labelling**

1. Age labelling or minimum/maximum user weight where appropriate
2. Manufacturer name and address
3. Importer name and address
4. Product identity code, item number
5. When for the safety use of the toy it requires adult supervision, an adult supervision warning required
6. Country of origin
7. GCTS mark
8. No graphic or wordings that is offensive to Islam or moral

## Part B: Physical Requirement Warnings of EN71-1

Below warnings and instruction shall be in Arabic languages.

| #  | Standard Clause No. | Example                                                                            | Requirements                                                                                                                                                                                                                                                         | Wording of Conditions of Use and Warnings                        | Translation in Arabia                                                                |

| Clause 4.4 Toys intended to be entered by a child                                |  | If the rate of spread of flame is between 10 mm/s and 30 mm/s, the appropriate part(s) of the toy and the packaging shall be marked with the warning | Warning.<br>Keep away from fire.          | تحذير. الابتعاد عن الحرق |

**Part D: Activity Toys for Domestic Use of EN 71-8****Clause 5 Warnings, Markings, and Instructions**

The activity toy or its packaging shall carry

- Minimum and/or maximum user age, and minimum and/or maximum user weight, if appropriate
- Activity toy is intended for indoor or outdoor use.
- Warning. Only for domestic use. يتم استخدامها تحت إشراف مباشر من الكبار

The warning shall be clearly visible at the time of purchase:

**Clause 5.1 Paddling Pools**

Paddling pools shall bear the following warning pictograms and warning text and the height of the pictograms shall not be less than 40mm.

a) Mandatory action pictogram

b) Prohibition pictogram

"Warning. Never leave your child unattended – drowning hazard"

Figure 11 — Warning pictograms and text

The height of the pictograms shall be not less than 40 mm.

**On Paddling pool:**

Warning on the paddling pool shall be indelible and easily legible

- in a colour which contrasts with the body of the paddling pool.
- placed below or to the side of the pictograms.
- background in white colour

The warning shall be clearly visible by the supervising adult during use of the paddling pool.

#### On packaging:

"Children can drown in very small amounts of water. Empty the pool when not in use".

"Do not install the paddling pool over concrete, asphalt or any other hard surface".

#### Clause 5.2 Assembly and installation instructions

- The warnings, markings and information specified in 5.1 shall be repeated
- Any other purchase information or information provided on the labels of the activity toys.
- Drawings which shall enable a consumer to correctly assemble the activity toy.
  - a. a recommendation to place the activity toy on a level surface at least 2 m from any structure or obstruction such as a fence, garage, house, overhanging branches, laundry lines or electrical wires;
  - b. detailed instructions on how anchors are to be installed to prevent overturning or lifting of the support members when they are used as intended or in a foreseeable way, taking into account the condition of the soil normally encountered;
  - c. instructions that anchors shall be placed level with or under the ground in order to reduce tipping hazards;
  - d. the minimum clearance that needs to exist between the swing element(s) and the ground, and, where this is adjustable, instructions on how to achieve this minimum clearance;
  - e. instructions that activity toys (for example paddling pools, swings, slides, climbing frames) shall not be installed over concrete, asphalt or any other hard surface;
  - f. a recommendation on the orientation of the activity toy (e.g. slides) in relation to its exposure to the sun;
  - g. information to keep the assembly and installation instructions for further reference;
  - h. instructions that modifications made by the consumer to the original activity toy (for example the adding of an accessory) shall be carried out according to the instructions of the manufacturer. In particular, instructions shall be provided with a kit/accessory about the installation of rope/nets concerning the minimum diameter, the need for fixation at both ends, overall length, and positioning in relation to other structures.

The assembly and installation instructions shall also, when appropriate, include the following:

### Clause 5.3 Maintenance

Need of carrying out checks and maintenance of the main parts (crossbeams, suspensions, anchors, etc.) at regular intervals, pointing out that if these checks are not carried out the activity toy could overturn or otherwise become a hazard. Whenever practical, the instructions shall also be affixed to the activity toy.

The maintenance instructions shall, when appropriate, also include the following recommendations pointing out that it is of particular importance that they be followed at the beginning of each season as well as at regular intervals during the usage season:

- to check all nuts and bolts for tightness and tighten when required;
- to oil all metallic moving parts;
- to check all coverings for bolts and sharp edges and replace when required;
- to check swing seats, chains, ropes and other means of attachments for evidence of deterioration;
- to replace defective parts in accordance with the manufacturer's instructions;
- to change the water of paddling pools frequently (particularly in hot weather) or when noticeably contaminated.

### Part E: Trampolines for domestic use EN71-14

### Warnings, Markings and Instructions

#### Clause 5.1 General

The warnings shall be preceded by the word: "Warning" or "Warnings", as appropriate (i.e. instead of repeating the word "Warning" before each warning when several of the required warnings are present, the word "Warnings" may be used once), and be clearly visible to the consumer before the purchase. The word "Warning" or "Warnings" may be followed by punctuation, e.g. an exclamation mark.

#### Clause 5.1.1 Warning regarding domestic use

- “Warning. Only for domestic use”.

The trampoline or its packaging shall carry the warning which shall be clearly visible at the point of sale

#### Clause 5.1.2 Warning regarding trampolines not intended for children under 36 months.

- “Warning! Not suitable for children under 3 years. Small part. Choking hazard.” OR
- “Warning! Not suitable for children under 3 years. Long cord. Strangulation hazard.”

When applicable, trampolines for domestic use shall comply with the warning requirement in EN 71-1:2014, 7.2. As indicated in EN 71-1, a brief indication of the specific hazard calling for the restriction.

### Clause 5.2 Warnings and markings on the product

#### Clause 5.2.1 General

In addition to applicable warnings in 5.1, the following warnings shall be visible when the user is standing in front of the entrance/access device:

- “Warning. Max xx kg”;
  - “Warning. Only one user. Collision hazard”;
  - “Warning. Adult supervision required”;
  - “Warning. [Indicate whether the trampoline is intended for indoor and/or outdoor use]”;
  - “Warning. No somersaults”;
  - “Warning. Always close the net opening before jumping”;
  - “Warning. Read the instruction”.
  - “Warning. The net should be replaced every (\*) year(s)”.
- (\*) The time is to be specified by the manufacturer.

### Clause 5.2.2 Marking of the centre of the mat

The centre of the mat of a medium or large trampoline shall be clearly marked in a colour contrasting to the mat and the mark used shall have a minimum size of 150 mm and a maximum size of 600 mm (see example in Figure 11). It is acceptable to use the manufacturer's logotype to mark the centre of the mat. In cases where the shape of the logotype is irregular and does not have a clear centre-point, the logotype shall be positioned as centred as possible and fully inside a fictive circle which has a diameter of 800 mm and is centred over the geometric centre of the mat (see example in Figure 11).

FIGURE 11 – EXAMPLE OF MARKING OF THE CENTRE OF THE MAT ON A CIRCULAR TRAMPOLINE

Key  
1 logo

### Clause 5.3 Warnings and markings on the packaging

The following warnings shall be marked on the packaging, be clearly visible at the point of sale:

- "Warning. Max xx kg";
- "Warning". [Indicate whether the trampoline is intended for indoor and/or outdoor use];
- "Warning. Only one user. Collision hazard";
- "Warning. The net should be replaced every (\*) year(s)".

Main dimension after assembly and free space required around the trampoline

(\*) The time is to be specified by the manufacturer.

In addition, the main dimensions of the assembled product and the free space required around the trampoline shall be clearly indicated on the packaging and/or be clearly visible at the point of sale.

**Clause 5.4 Warnings and information in the instructions for use****Clause 5.4.1 Warnings**

The following warnings shall as a minimum be included in the instructions for use:

**warning**

- "Warning. Max xx kg";
- "Warning". [Indicate whether the trampoline is intended for indoor and/or outdoor use];
- "Warning. The trampoline shall be assembled by an adult in accordance with the assembly instructions and thereafter checked before the first use";
- "Warning. Only one user. Collision hazard";
- "Warning. Always close the net opening before jumping";
- "Warning. Jump with/without shoes [as decided by the manufacturer]";
- "Warning. Do not use the mat when it is wet";
- "Warning. Empty pockets and hands before jumping";
- "Warning. Always Jump in the middle of the mat";
- "Warning. Do not eat while jumping";
- "Warning. Do not exit by a jump";
- "Warning. Limit the time of continuous usage (make regular stops)";
- "Warning. Do not use in strong wind conditions and secure the trampoline".
- "Warning. Only one user. Collision hazard";
- "Warning. Always close the net opening before jumping";
- "Warning. Jump with/without shoes [as decided by the manufacturer]";
- "Warning. Do not use the mat when it is wet";
- "Warning. Empty pockets and hands before jumping";
- "Warning. Always Jump in the middle of the mat";
- "Warning. Do not eat while jumping";
- "Warning. Do not exit by a jump";
- "Warning. Limit the time of continuous usage (make regular stops)";
- "Warning. Do not use in strong wind conditions and secure the trampoline".

### Clause 5.4.2 Information

In addition to the warnings in 5.4.1, the following information shall as a minimum be included in the instructions for use:

- instructions that the trampoline is not intended to be buried into the ground;
- an indication of product dimensions;
- jumping instructions;
- instructions on how to move the trampoline;
- a recommendation to place the trampoline on a level surface at least 2 m from any structure or obstruction such as a fence, garage, house, overhanging branches, laundry lines or electrical wires;
- instructions that trampolines shall neither be installed over concrete, asphalt or any other hard surface nor at proximity of other conflicting installations (e.g. paddling pools, swings, slides, climbing frames);
- instructions that modifications made by the consumer to the original trampoline (e.g. the adding of an accessory) shall be carried out according to the instructions of the manufacturer.

### Clause 5.4.3 Assembly and Maintenance Instructions

In addition to the warnings in 5.4.1 and the instructions in 5.4.2, the instructions for use shall include detailed instructions for assembly as well as maintenance instructions.

The maintenance instructions shall draw attention to the need to carry out checks and maintenance of the main parts (frame, suspension system, mat, padding, and enclosure) at the beginning of each season and also at regular intervals, pointing out that if these checks are not carried out, the trampoline could become dangerous.

Maintenance instructions shall, as appropriate, include the following recommendations:

- check all nuts and bolts for tightness and tighten when required;
- check that all spring-loaded (pit pin) joints are still intact and cannot become dislodged during play;
- check all coverings and sharp edges and replace when required;

- outdoor trampolines should be equipped with a device that in strong wind conditions avoid displacement due to wind (e.g. steel bars in the ground or loads like sand bag or water bags) and/or items catching wind like net and mat should be removed;
- in certain countries during winter period, the snow load and the very low temperature can damage the trampoline. It is recommended to remove the snow and store the mat and the enclosure indoor;
- check that mat, padding and enclosure are without defects;

NOTE Sunlight, rain, snow and extreme temperatures reduce the strength of these parts over time.

- replace the net and /or enclosure after (\*) year(s) of use:
- make sure that the hook-and-loop fasteners are closed correctly during use of trampoline.

(\*) The time is to be specified by the manufacturer.

The manufacturer shall provide information on how to secure the trampoline at strong wind conditions, e.g. removing items (net etc.) and/or fixing the trampoline to the ground.

## Part F: Electrical Toys of GSO IEC 62115

### Clause 7 Marking and Instructions

- The name, trade mark or identification mark of the manufacturer or responsible vendor;
- The model or type reference
- How to remove and insert the batteries;
- Non-rechargeable batteries are not to be recharged
- Rechargeable batteries are only to be charged under adult supervision;
- Rechargeable batteries are to be removed from the toy before being charged;
- Different types of batteries or new and used batteries are not to be mixed;
- Batteries are to be inserted with the correct polarity;
- Exhausted batteries are to be removed from the toy;
- The supply terminals are not to be short-circuited.

لا يجب شحن البطاريات الغير قابلة للشحن  
لا يجب شحن البطاريات قابلة للشحن إلا بحضور راشد  
لا يجب شحن البطاريات إلا من قبل راشد أو من أطفال فوق سن 8 سنوات  
يجب إزالة البطاريات القابلة للشحن من لعبة قبل انتهاء شحنها  
لا يجب خلط أنواع البطاريات أو البطاريات الجديدة والمستعملة  
وينبغي أن تدرج البطاريات مع القطبية الصحيحة  
يجب إزالة البطاريات المستوفاة من اللعبة  
لا يجب قطع محطة التزويد قطعاً مفاجئاً

Note: If the toy supplied with a battery charger for use by children, the instruction "Rechargeable batteries are only to be charged under adult supervision" may be replaced by: 'Batteries are only to be charged by adults or by children at least 8 years old'

#### Coin cell and button cell

– Toys using replaceable coin batteries shall carry the substance of the following warning on the packaging: Warning: Contains coin battery. Hazardous if swallowed – see instructions.

Or symbol

Instructions: Toys with Coin cell requires to add 1 and 2, with button cell requires to add 2.

1. Warning: This product contains a coin battery. A coin battery can cause serious internal chemical burns if swallowed.
2. Warning: Dispose of used batteries immediately. Keep new and used batteries away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

**Toy with battery box**

(1) The battery compartment shall be marked with:

- The nominal battery voltage;
- The symbol for d.c.

(2) The instructions shall contain the substance of the following as applicable:

- The toy is not to be connected to more than the recommended number of power supplies

**Toy with detachable lamps**

(1) The identification for detachable lamps shall be marked with:

- The rated voltage and type number, or
- The maximum power input, or
- The maximum current.

(2) The marking for power input or current of detachable lamps shall be as follows:

- lamp max ... W or lamp max ... A

- مصباح كحد أقصى ... (وات)
- مصباح كحد أقصى ... (أمبير)

ملاحظة

- The word "lamp" may be replaced by symbol
- The marking shall be visible when replacing the lamp.

## Battery toys with replaceable batteries

(1) The battery compartment shall be marked with the shape of the batteries in proportional size, together with their nominal voltage and polarity.

Examples representing three batteries are

IEC 2976/02

## Transformer toys

(1) The toy shall be marked with

- The rated voltage in volts;
- The symbol for a.c. or d.c. ;
- The rated power input, in watts or volt-amperes, if greater than 25 W or 25 VA;
- The symbol for transformer for toys.

Symbol for transformer for toys

Rate power input

Rate voltage and symbol for DC

# 1

- The marking of rated voltage and the symbol for a.c. or d.c. shall be placed adjacent to the terminals.
- The symbol for transformer for toys shall be marked on the packaging also

# 2

- The text “Not suitable for children under 36 months” may be replaced by the age warning symbol from EN 71-1.
- The age warning shall be visible to consumers at the time of purchase:
- A brief indication of the specific hazard (e.g. misuse of transformer can cause electrical shock) shall accompany the age warning or appear in the instructions which accompany the toy.

# 3

- The instructions for transformer toys shall contain the substance of the following, as applicable:
  - The toy is not intended for children under 3 years old;
  - The toy shall only be used with a transformer for toys;
  - The model number or specification of a suitable transformer for use with the toy;
  - The transformer is not a toy;
  - Toys liable to be cleaned with liquids are to be disconnected from the transformer before cleaning
  - The toy is not to be connected to more than the recommended number of power supplies

**Computer toys**

If the computer toys do not meet the requirement of 14.Z1 b, the instructions shall state the substance of the following:

- ☐ The toy is only to be connected to Class II equipment bearing the following symbol

**Battery toys intended to be used in water:**

The instructions shall state that the toy is to be operated in water only when fully assembled in accordance with the instructions.

**Toys having wires without connecting means:**

The instructions shall state that the wires are not to be inserted into socket-outlets,

لا ينبغي إدخال السلك في منافذ المقبس  
لا ينبغي إدراج الهوائي في منافذ المقبس

**Toy used with transformers or battery chargers**

The instructions state that transformers or battery chargers used with the toy are to be regularly examined for damage to the cord, plug, enclosure and other parts, and in the event of such damage, they must not be used until the damage has been repaired.

يجب فحص شاحن بطاريات اللعبة باستمرار للتأكد من سلامة الحبل الكهربائي و الأجزاء الضمنية الأخرى. و في حالة معاينة أضرار، يجب عدم استعمال شاحن بطاريات حتى يقع تصليحه.

**Assembled toy**

If the toys are intended to be assembled by a child, Instruction for assembly shall be provided when necessary for the safe operation of the toy.

If the toy is intended to be assembled by an adult, the instruction shall state that “assembled by an adult”

**Experimental sets**

The packaging shall be marked with the substance of the following:

- Warning: Only for use by children aged 8 years and older;

**The following information shall include in the instructions:**

(1) The instructions for parents shall state the minimum age of the child for whom the set is intended.

(2) Detailed information shall be given in the instructions on how to set up and perform each experiment. The instructions shall point out possible hazards and give technical information concerning the electrical parts, their behavior and how to handle them properly. All hazards that can be expected during an experiment, such as those resulting from the short-circuiting of batteries or the wrong connection of capacitors, shall be described in detail.

**Note:**

- The instructions should be written so that they are understandable by the age group for which the experimental set is intended.

(3) Instructions for children and for parents may be given separately. If the instructions are given in one leaflet, the section addressed to parents shall be given first.

(4) The instructions shall include a warning against manipulation of protective devices such as current-limiting devices. They shall describe the consequential dangers, such as overheating of cords, eruption of batteries and excessive heating.

Age warning for accessible parts exceeds the temperature limited

(1) The accessible parts of toys that are intended for children 3 years and over but less than 8 years which exceed the temperature rise limit for children less than 3 years according to IEC 62115 clause 9.10 shall carry the following warning:

- Warning. Not suitable for children under 36 months

**Note:**

- The text “Not suitable for children under 36 months” may be replaced

by the age warning symbol from EN 71-1.

- The age warning shall be visible to consumers at the time of purchase:
- A brief indication of the specific hazard (e.g. hot surface) shall accompany the age warning or appear in the instructions which accompany the toy.

(2) The accessible parts of toys that are intended for children 8 years and over, and which exceed the temperature rise limit for children 3 years to less than 8 years according to Table Z1 shall carry the following warning:

- Warning! Not suitable for children under 8 years

**Note:**

- The age warning shall be visible to consumers at the time of purchase:
- A brief indication of the specific hazard (e.g. hot surface) shall accompany the age warning or appear in the instructions which accompany the toy.

Toys with LED with flashing frequency 4 – 60 Hz. The packaging or instruction shall carry below warning

**Warning: This toy produces flashes that may trigger epilepsy in sensitised individuals.**

### Other instruction concerning safe operation

(1) Instructions shall be provided that give details concerning cleaning and maintenance when necessary for the safe operation of the toy.

## Other requirement on marking and instructions

(1) when the markings or instructions are on the packaging, the packaging shall state that: "Packaging must be retained since it contains important information".

(2) Instructions and other texts required by this standard shall be written in the official language of the country in which the toy is to be sold.

(3) The markings on the toy shall be legible and shall show no curling after rubbing test that rubbing the marking by hand for 15 s with a piece of cloth soaked with water and again for 15 s with a piece of cloth soaked with petroleum spirit.

### Part G: Other Commonly Used Safety Labelling Not from Toy Standards

#### SAFETY PRECAUTION FOR USING R/C TOYS

## 1. Outdoor toys intended for children over 12 years of age

### A. Warning on the toy

**“Warning. Do not contact the rotating rotor“**

- The warning shall appear on the operator panel visible to the child when operating the toy.
- Warnings before Purchase (visible at point of sale)
- Caution. Read the manual carefully before first use.
- To be used only outdoors – not to be used indoors. Risk of eye injuries.
- Warning. Not suitable for children under 12 years of age.
- Caution. Do not start up and fly when persons, animals or any obstructions are within the flying range of the helicopter.
- Note: The manufacturer should specify the flying range.

### B. Instructions for use

**Warning. Not suitable for children under 12 years of age.**

- Before first use: Read the user's information together with your child.
- Keep the instructions for use for later reference.
- Operations and safe use must be explained (preferably by graphical illustrations).
- Flying the helicopter requires skill and users must be trained under the direct supervision of an adult.
- Note for adult supervisors: Check if the toy is assembled as instructed.
- The assembly shall be performed under the supervision of an adult.
- Hands, hair and loose clothes must be kept away from the propeller (rotor). Do not touch the rotating rotor.
- Do not change or modify anything on the helicopter.
- For use only outdoors – not to be used indoors. Risk of eye injuries.
- Start and fly only when the area is appropriate for the intended use (free area, no obstacles) and only within direct visual contact

- Start and fly is strictly forbidden near high voltage poles, railway tracks, roads, swimming pools or open water.
- Caution. Do not start up and fly when persons, animals or any obstructions are within the flying range of the helicopter.
- Note: The manufacturer should specify the flying range. Only operate under good visibility and calm weather conditions.

## **2. Toy for domestic indoor and domestic garden use, by children of over 8 years of age**

### **A. Warnings and instructions for use: (visible at point of sale)**

- Warnings before Purchase
- Caution. Read the manual carefully before first use.
- Use only under adult supervision.
- To be used in domestic area (house and garden) only.
- Warning. Not suitable for children under 8 years of age.
- Instructions for use
- Warning. Not suitable for children under 8 years of age.
- Keep the instructions for use for later reference.
- Before first use: Read the user's information together with your child.
- Operations and safe use must be explained (preferably by graphical illustrations).
- Flying the helicopter requires skill and children must be trained under the direct supervision of an adult.
- For toys intended to be assembled by the child: Note for adult supervisors: Check if the toy is assembled as instructed. The assembly shall be performed under the supervision of an adult.
- Hands, hair and loose clothes shall be kept away from the propeller (rotor).
- Do not change or modify anything on the helicopter.
- For safe use, the room where the toy is used must be sufficiently large.
- This toy is intended to be used in domestic area (house and garden) only.
- Caution. Do not start up and fly when persons, animals or any obstructions are within the flying range of the helicopter.
- Caution. Risk of eye injuries. Do not fly near your face to avoid injuries.

### CONSTANT AIR INFLATABLE SAFETY PROCEDURES FOR THE SAFE OPERATION OF A BOUNCING CASTLE

- Under no circumstances must the equipment be interfered with or moved.
- In the event of high winds or inclement weather deflate the inflatable
- A responsible adult must supervise the unit at all times.
- Never overcrowd a unit and segregate different aged children.
- Ensure that no persons are on, or in the inflatable while inflating or deflating and never remove the plug without first checking.
- Persons using the inflatable must remove footwear, belts and glasses.
- No toys, sharp objects, water, food and drink allowed on the unit.
- The hirer is responsible to cover any hard surfaces adjacent to the entrance/exit with mats or soft material.
- No adults or pets are permitted to use our inflatables.
- No children are ever permitted to climb on the walls of an inflatable
- Never allow children to run out from the unit.

### CLEANING INSTRUCTION FOR TEXTILE TOYS

#### Usage, storage, cleaning method

A toy intended for use by children under 36 months must be designed and manufactured in such a way that it can be cleaned. A textile toy shall, to this end, be washable, except if it contains a mechanism that may be damaged if soaked. The toy shall fulfil the safety requirements also after having been cleaned in accordance with this point and the manufacturer's instructions.

**PLASTIC BAG WARNING**

“WARNING: Plastic bags can be dangerous. To avoid danger of suffocation, keep this bag away from babies and children.”

**COSTUME LABELING**

“Costume Safety Tips: Select a mask that fits securely and has eye holes large enough to allow for full vision. If wearing at night, carry flashlights in order to see and be seen. Keep away from lit candles and open flames.”

**GLITTER WARNING LABEL**

CAUTION: During handling and play this item may release particles of glitter.

**ENTANGLEMENT WARNING - STRAPS, STRINGS AND CORDS**

“CAUTION: Entanglement hazard. Keep away from very young children.”

“CAUTION: Entanglement hazard. Keep away from very young children. Do not place around neck.”

**COLLECTIBLE WARNING**

NOT INTENDED FOR USE AS A TOY.

THIS ITEM IS A COLLECTIBLE AND IS FOR DISPLAY PURPOSES ONLY.

DO NOT GIVE THIS TO A CHILD OF ANY AGE.

## ENVIRONMENTAL LABELLING

TOD NEERG

The Green Dot (German: Der Grüne Punkt) is the license symbol of a European network of industry-funded systems for recycling the packaging materials of consumer goods. The logo is trademark protected worldwide.

LOBMYS NAMIRT

The TRIMAN symbol was introduced into France as of the 1st January 2015. Made up of three elements representing the consumer, better waste treatment and recycling, it was originally intended to be printed on all products covered by an extended producer responsibility law in France (household packaging, textiles, furniture etc.). The symbol aims to harmonise the marking of recyclable products, and is only mandatory in France. The TRIMAN symbol is not replacing the Green Dot symbol. The Green Dot must still be printed on all household packaging placed onto the French market. If printed alongside the Green Dot or any other producer responsibility markings, the TRIMAN symbol must be of equal size.

## SPI RESIN CODE FOR RECYCLING PLASTIC

The ASTM International Resin Identification Coding System, often abbreviated as the RIC, is a set of symbols appearing on [plastic](#) products that identify the plastic resin out of which the product is made.<sup>[1]</sup> It was developed originally by the [Society of the Plastics Industry](#) (now the Plastics Industry Association) in 1988, but has been administered by [ASTM International](#) since 2008.<sup>[1]</sup>

Table of SPI resin codes

| Recycling number | Image | Alternate image #1 | Alternate image #2 | Abbreviation  | Polymer name               |
|------------------|-------|--------------------|--------------------|---------------|----------------------------|
| 1                |       |                    |                    | PETE or PET   | Polyethylene terephthalate |
| 2                |       |                    |                    | HDPE or PE-HD | High-density polyethylene  |
| 3                |       |                    |                    | PVC or V      | Polyvinyl chloride         |
| 4                |       |                    |                    | LDPE or PE-LD | Low-density polyethylene   |
| 5                |       |                    |                    | PP            | Polypropylene              |
| 6                |       |                    |                    | PS            | Polystyrene                |
| 7                |       |                    |                    | OTHER or O    |                            |

Below are the RIC symbols after ASTM's 2013 revision

| Resin Identification Number | Resin                        | Resin Identification Code –Option A                                                          | Resin Identification Code –Option B                                                            |
|-----------------------------|------------------------------|----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 1                           | Poly(ethylene terephthalate) | <br>PETE    | <br>PET     |
| 2                           | High density polyethylene    | <br>HDPE   | <br>PE-HD  |
| 3                           | Poly(vinyl chloride)         | <br>V     | <br>PVC   |
| 4                           | Low density polyethylene     | <br>LDPE  | <br>PE-LD |
| 5                           | Polypropylene                | <br>PP    | <br>PP    |
| 6                           | Polystyrene                  | <br>PS    | <br>PS    |
| 7                           | Other resins                 | <br>OTHER | <br>O     |

## WARNING FOR USING BATTERIES

|       |                                                                                                                                                                                                                                                                                                        |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DO    | – Use the correct size and type of battery specified by the manufacturer of your device.                                                                                                                                                                                                               |
| DO    | – Store batteries, in their original packaging, in a dry place and at normal room temperature until ready to use.                                                                                                                                                                                      |
| DO    | – Replace all used batteries in your device at the same time. Insert batteries properly, with the plus (+) and minus (–) terminals aligned correctly. CAUTION: Some equipment using more than three batteries may appear to work properly even if one battery is inserted incorrectly.                 |
| DO    | – Keep all batteries in a safe place away from children and pets, particularly the smaller sized batteries.                                                                                                                                                                                            |
| DO    | – Where possible, recycle your batteries where communities offer recycling or collection programs. You can contact your local government for information about the disposal options in your area.                                                                                                      |
| DO    | – Remove batteries from equipment while it is being powered by household (AC) current.                                                                                                                                                                                                                 |
| DON'T | – Leave batteries in your device if you suspect it will not be used for several months. Many devices don't power off completely when switched off and, after time, may cause the batteries inside to leak.                                                                                             |
| DON'T | – Carry batteries loose in your pocket or purse as they may create a safety risk. They can be shorted by contact with metal objects and may leak, overheat or rupture.                                                                                                                                 |
| DON'T | – Mix old and new batteries, batteries of different brands, or batteries of different types (for example heavy duty zinc chloride batteries and alkaline batteries) in the same device as this may cause the batteries to leak.                                                                        |
| DON'T | – Attempt to recharge non-rechargeable batteries. This can cause your batteries to overheat or leak.                                                                                                                                                                                                   |
| DON'T | – Place your batteries in a refrigerator. This will not 'recharge' your batteries, increase storage life, or increase your batteries' power.                                                                                                                                                           |
| DON'T | – Dispose of large numbers of batteries at one time. Where there are collection programs for used batteries in your area, store used batteries in a non-metal container in a well ventilated area, do not mix the batteries with other items, and bring to the collection facility on a regular basis. |
| DON'T | – Put batteries or battery-powered devices in very warm places. Extreme temperatures reduce battery performance and may also lead to leakage.                                                                                                                                                          |
| DON'T | – Remove the battery label, or attempt to take the battery apart, or dispose of in a fire as this may lead to rupture and/or chemical burns.                                                                                                                                                           |

## 8 Chapter Eight

# Inspection and Sampling

## A. Procedure on Selecting Samples

As it is not possible to test every type of toy in each consignment during surveillance testing due to financial or budget constraints, considerable effect on turnaround time (TAT) and other reasons for practicality, a risk-based procedure in taking samples can be followed.

The selection of sample is based on the predefined risk factor gauged according to different kind of hazard that may be found in toys. The toys with the higher risk factor will be prioritized during surveillance.

The Customs inspector should also consider the other factors such as the following while selecting samples based on the risk assessment of the toys.

- Country of Origin

The setting or place of manufacture can be a factor in considering the risk of toys. For instance, toys which are manufactured in countries with higher occurrences of poor quality products, counterfeit products, higher incidences of product recalls, dangerous goods, etc. are to be considered as high risk.

- Toy Manufacturer/Brand

The maker of the toy or its Brand name can also be a factor in gauging the risk. Toys manufactured by non-reputable or not widely known toy brands/makers or the small players in the toy business can be considered as more risky than the toys manufactured by the reputed toys manufacturers/brands.

- Exporter Type

The responsible party exporting the toy to the destination countries should also be considered. For instance, toys exported by traders are considered as with higher risk than toys exported directly by the manufacturers.

For example, if the consignment includes toys with Low Risk factor coming from a High Risk Country, High Risk Exporter and a High Risk Brand, then because of these other factors, the toy can be considered a toy with High Risk factor as well considering the Overall Risk.

## B. Procedure on Handling of Toys which have Failed the Surveillance Testing

If non-compliance is identified, the following will be the course of action:

1. Notify the concerned parties/entities of the non-compliance.
2. The concerned party (i.e. importer) shall provide all information and documents they have that are related to the products which have failed the surveillance test. The documents shall include the Certificate of Conformity (CoC) issued by the Certification Body for the relevant shipment.
3. An investigation will be conducted on the Certification Body which has issued the Certificate of Conformity.
4. If after all investigations and cross-verifications, the toys are found conclusively non-compliant, various actions are applicable depending on the complexity of the non-compliance.

#### • Return of Shipment

The shipment will be rejected and the importer/exporter of the subject toys will be required to return the shipment to the country of supply.

#### • Product Recall

Product recall is necessary if there is a discovery of safety issues or product defects that might endanger the consumer. Products on the market that are suspected or known to be seriously defective and/or pose a potential risk to the consumer must be recalled. This must be done promptly, comprehensively and in accordance with requirements and regulations of Statutory Authority.

The manufacturer/distributor shall submit complete distribution details of all shipments of the suspect lot(s), including complete names and addresses of all consignees, supporting documentation that will assist the Statutory Authority in identifying and evaluating the problem such as product complaints, product specifications and test results, including the methods used to obtain the results. Statutory Authority will also need to obtain copies of all labelling associated with the product.

## Scenarios faced during Product recalls:

- Reconciliation where the recalled product is subject to corrective action  
Affected products shall be serviced and the defect needs to be rectified before it is presented back to the consumer.
- Reconciliation where the recalled product needs to be destroyed  
In addition to testing of the replaced products to ensure product/consumer safety  
A supervised destruction of the affected recalled products returned by the consumers shall be done. Destruction of products shall be carried out taking into consideration the impact on the environment and in order to ensure that the product is not being resold or utilized illegally.

Random verification is necessary to check if reconciliation has been carried out effectively. If the reconciliation was found to be non-successful, the Statutory body undertakes regulatory action against the toy manufacturer/distributor.

## C. Traceability and Compliance Document Checking

1. To use the GCTS mark to track the compliance of a toy

### Purpose of GCTS

a. The GCTS is a symbol granted by GSO representing the Gulf Conformity Marking. A product with the GCTS means that it has gone through a conformity assessment process according to GTTR by a notified body. The toy is in compliance with all the safety requirement of the GTTR.

b. Generally, notified body would approve the GCTS mark after reviewing the following of the toy

### For manufacturer

1. GC type examination according to GTTR. Or,
2. Conformity assessment procedures for GCTS. Review the following
  - a. Safety assessment report (includes review BOM, product specification).
  - b. Test reports for all relevant GSO standards and meet essential safety requirement.
  - c. Labelling checking to ensure it comply with GTTR requirement.

### For importers

3. Unlink importers certification

c. Usage

GCTS mark consists of the G mark, notified body code and also the QR code. When scanning the QR code by any mobile phone or scanner, users can check the information of the toy through the GSO certificate tracking system.

d. After scanning the QR code, the below screen can be seen in the scanner.

- Product information including name, model number, description on function, country of origin.
- Manufacturer identity
- Product photo
- Information of the certification body
- Expiry date of the certification

### e. How to use the information

- With the information show in the GCTS site, users can check whether this product match the characteristic show in GCTS site. If everything matches, it can prove the toy has gone through the conformity assessment procedures and meet all safety requirements.
- If there is any unclear, it can also trace back to the notified body for further clarification.

2. To use the Certificate Tracking system to track the compliance of a toy

Information of the product can be entered directly into the search field on the GCTS portal webpage of the GSO (<https://www.gso.org.sa/gcts/>)

For Example: Model Number

The screenshot shows the GSO Conformity Tracking System interface. The top navigation bar includes 'Home', 'Products', 'Certificates', and 'More'. A search bar is prominently displayed with the text 'Model Number' and a search icon. Below the search bar, there are filters for 'Product', 'Manufactured In', 'Brand', and 'Economic Operator'. The main content area displays a table of 'Registered Products' with columns for 'Product GCTS', 'Product', 'Brand', 'Manufacturer', and 'Country'.

| Product GCTS | Product                                                   | Brand               | Manufacturer                         | Country |
|--------------|-----------------------------------------------------------|---------------------|--------------------------------------|---------|
| 34693        | Easel Accessory Set                                       | Melissa & Doug, LLC | Melissa & Doug, LLC                  | CN      |
| 34682        | Fabric Steamer                                            | Laurastar           | Laurastar SA                         | CN      |
| 34659        | Impeller-type Washing Machine (automatic Washing Machine) | Starvision          | ARABIAN INTERNATIONAL APPLIANCES EST | CN      |
| 34657        | Super Hero                                                | Hasbro              | HASBRO SA                            | VN      |

On GSO portal it is possible to use the search field to run different searches:

- All: a generic search in all GCTS numbers, Products, Models and Economic Operator
- GCTS No • Product Name • Model No. • Manufacturer

This screenshot shows the same GSO Conformity Tracking System interface, but with the search dropdown menu open. The dropdown menu lists the following search options: 'GCTS Number', 'Product Name', 'Model Number', 'Manufacturer', and 'All'. The 'All' option is currently selected.

| Product GCTS | Product                                                   | Brand               | Manufacturer                         | Country |
|--------------|-----------------------------------------------------------|---------------------|--------------------------------------|---------|
| 34693        | Easel Accessory Set                                       | Melissa & Doug, LLC | Melissa & Doug, LLC                  | CN      |
| 34682        | Fabric Steamer                                            | Laurastar           | Laurastar SA                         | CN      |
| 34659        | Impeller-type Washing Machine (automatic Washing Machine) | Starvision          | ARABIAN INTERNATIONAL APPLIANCES EST | CN      |

The screenshot shows the GSO Conformity Tracking System interface. On the left, there is a 'Filters' sidebar with a 'Clear All' button. Under the 'Product' section, a search bar is present, and a list of product categories is shown. The 'Electrical Toy' category is selected and highlighted with a red circle. The main area displays 'Registered Products' with a table of results. The table has columns for Product GCTS, Product, Brand, Economic Operator, and Country. The results show multiple entries for 'Electrical Toy' from various countries, including the United Arab Emirates and China.

| Product GCTS | Product        | Brand | Economic Operator | Country              |
|--------------|----------------|-------|-------------------|----------------------|
|              | Electrical Toy |       |                   | UNITED ARAB EMIRATES |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |
|              | Electrical Toy |       |                   | CHINA                |

Filters are also available on the left side to filter and find a certificate or product: Certificates can be filtered by: Product, Manufactured In, Brand, and Economic Operator

This screenshot shows the same GSO Conformity Tracking System interface, but with the 'Electrical Toy' filter selected in the sidebar. The 'Registered Products' table on the right shows the same results as the previous screenshot, with multiple entries for 'Electrical Toy' from various countries.

| Product GCTS | Product        | Brand | Economic Operator | Country              |
|--------------|----------------|-------|-------------------|----------------------|
|              | Electrical Toy |       |                   | UNITED ARAB EMIRATES |

### 3. Information in the Certificate Tracking System

Scanning the QR code or through GSO portal it is possible to see information regarding the product and information regarding the certificate validity and its status.

**The following details need to be checked:**

- product name,
- trademark,
- model no.,
- country of origin,
- photos,
- activation expiry date,
- certificate status.

### ACTIVE AND VALID CERTIFICATES

Certificate approved by NB and GSO and registered on GSO certificate tracking system. The System shows certificate details and registration expiry date.

The function “view additional details” is available only for surveillance and customs authorities that received login details from GSO.

The screenshot displays the GSO Conformity Tracking System web portal. At the top, there is a navigation bar with the GSO logo, the text 'GSO Conformity Tracking System', and links for 'Home', 'Products', 'Certificates', and 'More'. On the right side of the navigation bar, there are icons for 'العربية' (Arabic), 'Help', 'User Guide', and 'Me'.

The main content area is titled 'Product Verification'. Below this title, a green banner contains a checkmark icon and the text: 'Product has an active conformity certificate. Activation expires on: 2022-09-10'. This banner is highlighted with a red rectangle.

Below the banner, there is a section titled 'Product Details' which lists the following information:

|                 |                                                                                                                                                   |

## How to check technical document

### a. Certificate

- Usually there are 3 different certificates for toys

#### 1. GC type examination certificate

When essential in GTTR do not addressed by Gulf toy standard or toy not conform entirely to Gulf standards. Notified body certifies the toy according to annex IV of GTTR.

#### 2. Shipment certificate for unlink importers.

Notified body certify the shipment for unlink importer in GCC according to annex V of GTTR.

#### 3. GCTS certificate.

### b. Test Reports

- Only ISO/IEC 17025 accredited laboratory test report are accepted.

Laboratories shall be accredited by GAC or accredited bodies with ILAS status.

Below are examples of the accredited bodies

GAC of GCC countries

CNAS of China

UKAS of UK

HOKLAS of Hong Kong

- Test reports should have the accreditation marks as shown. If there is unsure about the status of the accreditation bodies or the laboratories accreditation scope, it can be check on the web site.
- Not all the test items in every laboratories are accredited. As a minimum, EN71-1, 2, 3 and IEC/EN 62115 tests report should be the accredited test items of the acceptable laboratories.
- Test report shall be within 3 years and all standards version are updated or at least the version before latest one.
- All test reports shall have a unique report number.
- Test reports shall have a firm conclusion that the entire requirement in the standard tested are fulfilled. Be careful to read the remarks of the reports.
- Whenever there is a conclusion, there shall be test results for validation found inside the reports.
- Test reports shall have the signatory by the authorized personal of the laboratories.
- The identification of the products include name, item number and photo shall match with the actual product examined.
- Be careful reading the test conducting dates. Whether the samples were tested at one time or tested in several submissions. If such, ensure the quality of the products are consistence.
- There shall be no sign of correction in test reports. Font size, font types are consistence through the report.
- When there is doubt, consult the issuance laboratories for validation.
- Declaration of Conformity (DoC)
- According to GTTR, after completed all the conformity assessment procedures and ensure the toys in compliance with the GTTR safety requirement, manufacturers and importers shall issue declaration of conformity (DoC). Normally, there shall be two DoC for every toy products. The manufacturer's DoC and the importer's DoC.

Below are the formats of the DoC

## MANUFACTURER CONFORMITY DECLARATION OF TOYS

| Declaration of Conformity                                                                                                                                                  | الإقرار بالمطابقة                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. No (unique identification of the toy(s))                                                                                                                                | 1. الرقم. (التعريف الوحيد للعبة أو اللعب)                                                                               |
| 2. Name and address of the manufacturer or his authorized representative.                                                                                                  | 2. اسم وعنوان الصانع أو ممثله الرسمي                                                                                    |
| 3. This declaration of conformity is issued under the sole responsibility of the manufacturer.                                                                             | 3. تم إصدار هذا الإقرار تحت المسؤولية الكاملة للصانع:                                                                   |
| 4. Object of the declaration (identification of toy allowing traceability). It shall include a colour image of sufficient clarity to enable the identification of the toy. | 4. موضوع الإقرار (تعريف اللعبة مع توفير معطيات التتبعية). يجب إرفاق صورة بالألوان واضحة بما فيه الكفاية للتعريف باللعبة |
| 5. The object of the declaration described in point 4 is in conformity with the relevant Community harmonisation legislation:                                              | 5. موضوع الإقرار المبين في الفقرة 4 مطابق لمتطلبات اللوائح الفنية الخليجية:                                             |
| 6. References to the relevant standards used, or references to the specifications in relation to which conformity is declared.                                             | 6. مراجع المواصفات القياسية الخليجية، أو مراجع المتطلبات الفنية المستخدمة في الإقرار بالمطابقة.                         |
| 7. The notified body name & number, description of intervention, Module used & certificate issued                                                                          | 7. اسم الجهة المقبولة ورقمها (إذا لزم)، تحديد نطاق تدخلها، إجراء تقويم المطابقة المستخدم والشهادة الصادرة عنها          |
| 8. Additional information:                                                                                                                                                 | 8. معطيات إضافية:                                                                                                       |
| Signed for and on behalf of:                                                                                                                                               | موقع من طرف وبتفويض عن:                                                                                                 |
| (place and date of issue)                                                                                                                                                  | (مكان وتاريخ الإصدار)                                                                                                   |
| (name, function)                                                                                                                                                           | (الاسم، الوظيفة)                                                                                                        |
| (signature)                                                                                                                                                                | (التوقيع)                                                                                                               |

## IMPORTER CONFORMITY DECLARATION OF TOYS

| Declaration of conformity                                                                                                                                 | الإقرار بالمطابقة                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. Name and address of the importer declaring compliance of the product.                                                                                  | 1. اسم وعنوان المستورد المسئول عن إصدار الإقرار بمطابقة اللعب                                                           |
| 2. Identification of the toys covered by the declaration<br>Provide detailed determinant to identify all items covered by this declaration and no others. | 2. تعريف اللعب المشمولة بالإقرار<br>يجب توفير أرقام التعريف الكافية لتحديد كل اللعب المشمولة بالإقرار وتمييزها عن غيرها |
| 3. References to the gulf product safety regulations and relevant standards to which conformity is declared.                                              | 3. مراجع اللوائح الفنية الخليجية والمواصفات القياسية الخليجية التي يُشهد بالمطابقة معها                                 |
| 4. This declaration of conformity is issued under the sole responsibility of the importer.                                                                | 4. أصدرت هذه الشهادة تحت المسؤولية الكاملة للمستورد.                                                                    |
| 5. Toys described in point 2 are in conformity with the gulf product safety regulations and the relevant standards referred to in point 3                 | 5. اللعب المبينة في الفقرة 2 مطابقة مع اللوائح الفنية الخليجية والمواصفات القياسية الخليجية المشار إليها في الفقرة 3    |
| 6. The notified body on whose Conformity Assessment Procedure (CAP) the certificate depends: name & number, description of CAP, & certificate issued      | 6. اسم الجهة المقبولة المتدخلة (إذا لزم) ورقمها، تحديد إجراءات تقويم المطابقة المنجزة، والشهادة الصادرة عنها.           |
| 7. Additional information:                                                                                                                                | 7. معطيات إضافية:                                                                                                       |
| Signed for and on behalf of:                                                                                                                              | موقع من طرف وبتفويض عن:                                                                                                 |
| (place and date of issue)                                                                                                                                 | (مكان وتاريخ الإصدار)                                                                                                   |
| (name, function)                                                                                                                                          | (الاسم، الوظيفة)                                                                                                        |
| (signature)                                                                                                                                               | (التوقيع)                                                                                                               |

## c. Other Technical Document of Toys

Below is the technical document list of manufacturers according to GTTR

| Section            | Required Technical Documentation referred to in Article 21 of the directive                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Document / File name |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Annex IV (a)       | <b>Product Specification</b> , including : <ul style="list-style-type: none"> <li>• Color image of the toy</li> <li>• Description of intended function/operation/performance</li> <li>• Age grading</li> </ul>                                                                                                                                                                                                                                                                                                                                     |                      |
|                    | <b>Packaging specification</b> : <ul style="list-style-type: none"> <li>• Artwork of packaging</li> <li>• Artwork of instruction, manual and other leaflet</li> </ul>                                                                                                                                                                                                                                                                                                                                                                              |                      |
|                    | <b>Manufacturing drawings</b> , for example, conceptual design drawing, engineering drawing, parts drawing, explode diagram, circuit diagram, any explanation of the draw                                                                                                                                                                                                                                                                                                                                                                          |                      |
|                    | <b>Description of manufacturing process</b> , including process flow charts and/or descriptions                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                      |
