protection requirements for specific conditions, such as an outdoor enclosure can't have water enter, but outdoor equipment can have water enter.

In IEC 62368-1 Ed 4, "loudspeaker drivers" are defined. However, "loudspeaker driver assemblies" are not defined. Are the internal crossover components in a speaker considered a part of the "loudspeaker driver assembly"?

Does the exception in the latter part of sub-clause 5.5.7 apply to surge suppressors connected between L-L, L-N or L/N-PE? Is a varistor inside a COTS SPD certified according to IEC 61643-11 also required to be also compliant with Annex G.8?

Can an IECCE CB certification according to IEC 62368-1 accept an IEC 60601-1 certified safety class II power supply

When applying Creepage distance requirements, is it correct to use the material group of “Other materials” and “Printed Boards” for the top/bottom layers and “inner layers” of a printed circuit board (PCB), respectively?

Is it acceptable to use an enclosure with a high IP rating (e.g., IP69 or NEMA Type 6) to void testing per sub-clause 5.4.1.5.2 in order to establish a PD1 environment inside an AC/DC switch mode power supply?

Is a 70 V paging system that sends amplified audio through the building wiring via NEC Class 2 cable subjected to Annex Q?
