Guidebook on the Mandatory Packaging Reporting

Disclaimer

The Mandatory Packaging Reporting (MPR) Guidebook is developed by the National Environment Agency (NEA) with the aim of providing administrative guidance to companies in complying with the MPR. This Guidebook should be read in conjunction with Part 4 of the Resource Sustainability Act, Reporting in Relation to Packaging; as well as the Resource Sustainability (Packaging Reporting) Regulations 2020.

The contents herein serve only as a guide and are not intended to be an authoritative statement of the law or a substitute for legal or other professional advice. In the event of inconsistency between this document and the legislation, the legislation will prevail. The legislation may be accessed at <https://www.nea.gov.sg/packaging>.

NEA, its officers and employees shall not be responsible for any inaccuracy, error or omission in this publication or liable for any damage or loss of any kind as a result of any use of or reliance on this publication.

The contents of this publication are protected by copyright, trademark or other forms of proprietary rights and may not be reproduced, republished or transmitted in any form or by any means, in whole or in part, without written permission from NEA.

For more information on the MPR and its requirements, kindly visit www.nea.gov.sg/packaging or write to packaging@nea.gov.sg.

About This Guide

This Guidebook is developed by the National Environment Agency (NEA) with the aim of providing guidance to obligated companies under the Mandatory Packaging Reporting (MPR) framework in complying with Part 4 of the Resource Sustainability Act, Reporting in Relation to Packaging; and submission of reports and relevant documents through the Waste and Resource Management System.

Case studies have been included in this guide to provide additional guidance to companies in applying the principles covered in this guidebook.

Companies may refer to the 3R Guidebook for Packaging at <http://www.packaging-partnership.org.sg/resources/3r-guidebook-packaging> that was co-developed by the Singapore Manufacturing Federation and the NEA as part of the Packaging Partnership Programme for guidance in developing and implementing 3R (reduce, reuse, recycle) plans in alignment with the MPR requirements.

About National Environment Agency

The National Environment Agency (NEA) is the leading public organisation responsible for ensuring a clean and sustainable environment for Singapore. Its key roles are to improve and sustain a clean environment, promote sustainability and resource efficiency, maintain high public health standards, provide timely and reliable meteorological information, and encourage a vibrant hawker culture. NEA works closely with its partners and the community to develop and spearhead environmental and public health initiatives and programmes. It is committed to motivating every individual to care for the environment as a way of life, in order to build a liveable and sustainable Singapore for present and future generations.

Introduction

The Resource Sustainability Act (RSA) that was gazetted on 4 October 2019 gives legislative effect to the regulatory measures targeting the three priority waste streams of e-waste, food waste and packaging waste. The Mandatory Packaging Reporting (MPR) which commenced on 1 July 2020, aims to raise awareness among companies on the benefits of packaging waste reduction and to spur companies to reduce the amount of packaging used which could generate cost savings, while offering flexibility in the implementation. In developing 3R plans, companies can consider initiatives that facilitate the recycling of packaging waste, such as through using packaging material that is easier to recycle or implementing voluntary packaging take-back and recycling schemes.

The MPR will enable NEA to obtain comprehensive packaging data that would aid in the development of policies and programmes on packaging waste management. It will also lay the foundation for an Extended Producer Responsibility (EPR) framework for managing packaging waste, including plastics, which NEA is currently studying.

Coverage of the Mandatory Packaging Reporting

2.1 Companies Covered Under the Mandatory Packaging Reporting

Companies that meet all the following criteria¹ are required to comply with the Mandatory Packaging Reporting (MPR):

- 1 Carries on a business of supplying regulated goods in Singapore
- 2 Meets the prescribed threshold criteria of an annual turnover of more than S\$10 million²
- 3 Imports specified packaging as per section 19(2)(a) of the Resource Sustainability Act (RSA) or uses specified packaging as per section 19(2)(b) of the RSA

Summarised below are the MPR requirements:

- 1 Submit annual reports using the Packaging Data Excel Reporting Template provided by NEA, accessible at <http://www.nea.gov.sg/packaging> relating to the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) that furthers the business of supplying regulated goods in Singapore, by March of every reporting year (starting from 2022).

Note:

A non-exhaustive list of examples of what is seen to further the business of supplying regulated goods in Singapore can be found on pages 36 and 37.

Each report must state the weight and form of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) (in the year before, (T – 1)) according to the type of material.

- 2 Submit methodology document that explains the methodology used in recording the material, weight and form of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) in the Packaging Data Excel Reporting Template.

Source:

¹ By meeting all the criteria, a company would be seen as meeting the definition of a “Producer” as defined through section 19(2) - Part 4 of the Resource Sustainability Act.

² NEA will review the threshold in subsequent years, and the prescribed threshold criteria may be adjusted over time.

- 3 Develop 3R (reduce, re-use or recycle) plans for packaging in Singapore that will be completed within 3 years (with respect to the year when the 3R plan was submitted) based on either of the following plans:

a. Packaging Reduction

b. Packaging Collection for Reuse

c. Packaging Collection for Recycling

d. Consumer Outreach related to Packaging 3Rs

e. Industry Outreach related to Packaging 3Rs

f. Use of Recycled Content in Packaging Material

g. Improving Recyclability of Packaging

Note:

These plans are not limited to the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) by the producer and can be for packaging used and/or disposed of within the premises, or those that are excluded from the packaging data reporting.

- 4 Keep records related to above reports and plans based on prescribed requirements for a period of 5 years.

Obligated companies are required to submit the filled Packaging Data Excel Reporting Template, methodology and at least one 3R plan via the MPR portal within the Waste & Resource Management System (WRMS), accessible at <https://wrms2.nea.gov.sg> or through the NEA MPR website at <http://www.nea.gov.sg/packaging>.

2.1.1

Carries on a Business of Supplying Regulated Goods in Singapore

A company is in the business of supplying regulated goods in Singapore as long as the supply of regulated goods in Singapore is in accordance with its legislative meaning as prescribed through section 19(1) of the RSA, reproduced below:

“Supply”, in relation to any regulated goods, includes —

- a the supply of the regulated goods by way of sale (including by barter or exchange), lease, loan, hire or hire-purchase
- b the supply of the regulated goods by retail or by wholesale
- c the supply of the regulated goods in connection with any agreement
- d the offer to supply the regulated goods or exposure of the regulated goods for supply

Companies that only export or tranship regulated goods are not in the business of supplying regulated goods in Singapore as long as none of the regulated goods are supplied in Singapore, and all of the regulated goods are either (or will be) exported or transhipped out of Singapore.

2.1.2

Prescribed Threshold Criteria

The Resource Sustainability Act (RSA) allows the threshold criteria to be set as:

- a the annual turnover of the company and/or;
- b the quantity of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) by the company

The prescribed threshold criteria for the current phase of the Mandatory Packaging Reporting (MPR) are set as an (a) annual turnover exceeding S\$10 million. There are no threshold criteria set for (b). This, however, may be reviewed in the future.

The annual turnover is not limited to the gross revenue generated through the import (s19(2a) RSA) or use (s19(2b) RSA) of specified packaging. It instead refers to the overall gross revenue of the Singapore registered company in respect of the business in Singapore, whether in relation to the supply of regulated goods or otherwise. The turnover over the period from 1 January to 31 December must be used to determine the annual turnover for a particular year.

2.1.3

Definition of "Import"

"Import" as defined through section 2(1) of the Resource Sustainability Act (RSA) and Common Interpretation Act means to bring or cause to be brought into Singapore by land, sea or air. It does not include the bringing into Singapore of any regulated goods which are to be taken out of Singapore on the same conveyance on which they were brought into Singapore without any landing or transshipment within Singapore. Import is not limited to the physical act of importing goods into Singapore, it can also include the act of causing the importation of goods in Singapore e.g. by engaging another company to import on your company's behalf.

Goods that are brought into Singapore and intended to be supplied in Singapore.

Goods that are brought into Singapore and then brought out of Singapore.

Companies may refer to the checklist in Appendix B to assess if they are required to comply with the Mandatory Packaging Reporting and for guidance as to what should be reported. Case studies are available in Appendix C to aid in identifying reporting obligations.

The scenarios below detail the reporting obligations based on the more common “import” related activities.

Note:

The scenarios below assume that there is no agreement between your company and another (e.g. specific instructions, contract, or engagement) to import and/or supply these regulated goods or to control the supply of regulated goods in Singapore in any way. If such an agreement exists, please consult NEA.

S/N	Activity & Specified packaging to be reported	Scenario
1	Regulated goods in specified packaging are directly imported and supplied in Singapore by your company.  Specified packaging to be reported by your company: Those associated with the imported regulated goods should be reported by your company.	Company C imports regulated goods in Singapore and supply these to Company A.  Figure 1 ————— Import Scenario #1 Who should be reporting the associated specified packaging? Company C would be obligated to report the associated specified packaging as they imported these regulated goods.

S/N	Activity & Specified packaging to be reported	Scenario
2	Regulated goods in specified packaging are imported on behalf of your company and supplied in Singapore by your company.  Specified packaging to be reported by your company: Those associated with the imported regulated goods should be reported by your company.	Company C engages Company D to import regulated goods in Singapore on their behalf and Company C supplies these to Company A.  Legend: - Regulated Goods (Red dotted arrow) - Money for Regulated Goods (Blue solid arrow) - Order (cause the import to occur) (Purple dashed arrow) Figure 2 Import Scenario #2 Who should be reporting the associated specified packaging? Company C would be obligated to report the associated specified packaging as these regulated goods are brought into Singapore on their behalf.

S/N	Activity & Specified packaging to be reported	Scenario
3	Regulated goods in specified packaging are supplied in Singapore by your company but drop shipped to or imported by your customers. Specified packaging to be reported: None, those associated with the drop shipped or imported regulated goods (by your customers) should be reported by your customers if they are producers (s19(2) RSA) themselves.	Company C does not import regulated goods in Singapore, instead, these are supplied by Company C to Company A and either drop shipped or imported by Company A. The diagram is divided into two sections: 'Overseas' and 'Singapore' by a vertical dashed line. In the 'Overseas' section, there is a blue box labeled 'Company C's supplier'. In the 'Singapore' section, there are two boxes: a green one labeled 'Company A' and a blue one labeled 'Company C'. Three numbered green circles (1, 2, 3) are placed near the flow lines. A red dotted arrow labeled '3' points from 'Company C's supplier' to 'Company A'. A blue solid arrow labeled '2' points from 'Company C' to 'Company C's supplier'. A purple dashed arrow labeled '1' points from 'Company A' to 'Company C'. A legend box below the diagram defines the arrow types: red dotted for 'Regulated Goods', blue solid for 'Money for Regulated Goods', and purple dashed for 'Order (cause the import to occur)'. Figure 3 Import Scenario #3 Who should be reporting the associated specified packaging? Company A would be obligated to report the associated specified packaging if they are producers (s19(2) RSA) themselves as these regulated goods are brought into Singapore because of an order made by them, causing these to be brought into Singapore. These regulated goods would be seen to have been imported by Company A in furtherance of their business of supplying regulated goods in Singapore.

S/N	Activity & Specified packaging to be reported	Scenario
4	Regulated goods in specified packaging are supplied in Singapore by your company however these are not imported into Singapore beforehand and only imported once your customers order them.  Specified packaging to be reported: Depends, if: 1 Your company only supplies these regulated goods to a single company • None, those associated with the imported regulated goods should be reported by the company if they are producers (s19(2) RSA) themselves. 2 Your company supplies these regulated goods to multiple companies • Those associated with the imported regulated goods should be reported by your company.	Company C supplies regulated goods in Singapore only to Company A. Only when Company A has ordered and made the payment to Company C would Company C import these regulated goods and deliver them to Company A, who is considered as the “producer” according to s19(2) of the RSA that carries on a business of supplying these regulated goods in Singapore.  Overseas Singapore Company C's supplier Company A Company C Legend: - Regulated Goods - Money for Regulated Goods - Order (cause the import to occur) Figure 4 Import Scenario #4 Who should be reporting the associated specified packaging? Company A would be obligated to report the associated specified packaging if they are producers (s19(2) RSA) themselves as these regulated goods are brought into Singapore because of an order made by them, causing these to be brought into Singapore. Note: Company C would be obligated to report the associated specified packaging if they imported these regulated goods and supplied them to multiple companies in Singapore.

S/N	Activity & Specified packaging to be reported	Scenario
5	Regulated goods in specified packaging are not supplied in Singapore by your company. Instead, companies deal directly with your overseas supplier or HQ. These regulated goods in specified packaging are drop shipped to or imported by the companies.  Specified packaging to be reported: None, those associated with the drop shipped or imported (by the companies) regulated goods should be reported by the companies if they are producers (s19(2) RSA) themselves.	Company A purchases regulated goods directly from Company C's overseas HQ. These regulated goods are either drop shipped or imported by Company A who is also a "producer" according to s19(2) of the RSA and will carry on a business of supplying these regulated goods in Singapore.  The diagram illustrates the flow of regulated goods, money, and orders between Overseas and Singapore. In the Overseas section, there is a box for 'Company C's supplier (e.g. HQ)'. In the Singapore section, there are boxes for 'Company A' and 'Company C'. A red dotted arrow labeled '2' points from the Overseas supplier to Company A. A blue solid arrow labeled '1' points from Company A to Company C. A purple dashed arrow points from Company C to the Overseas supplier. A legend below the diagram defines the arrow types: red dotted for Regulated Goods, blue solid for Money for Regulated Goods, and purple dashed for Order (cause the import to occur). Figure 5 Import Scenario #5 Who should be reporting the associated specified packaging? Company A would be obligated to report the associated specified packaging if they are producers (s19(2) RSA) themselves as they imported these regulated goods in furtherance of their business of supplying regulated goods in Singapore.

S/N	Activity & Specified packaging to be reported	Scenario
6	Regulated goods in specified packaging are not supplied in Singapore by your company. Instead, companies deal directly with your overseas supplier or HQ. Your company only imports regulated goods in specified packaging and delivers them to these companies.  Specified packaging to be reported: None, those associated with the imported regulated goods should be reported by the companies if they are producers (s19(2) RSA) themselves.	Company A purchases regulated goods directly from Company C's overseas HQ. Once these regulated goods are supplied by Company C's overseas HQ to Company A, Company C would import these regulated goods and deliver them to Company A who is a "producer" according to s19(2) of the RSA and will carry on a business of supplying these regulated goods in Singapore.  The diagram is divided into two sections: 'Overseas' and 'Singapore' by a vertical dashed line. In the 'Overseas' section, there is a blue box labeled 'Company C's supplier (e.g. HQ)' with a person icon. In the 'Singapore' section, there are two boxes: a green one labeled 'Company A' and a blue one labeled 'Company C', both with person icons. A solid blue arrow labeled '1' points from the 'Overseas' supplier to 'Company A'. A dashed red arrow labeled '2' points from 'Company C' to 'Company A'. A dashed purple arrow points from 'Company C' back to the 'Overseas' supplier. A legend box at the bottom of the diagram defines the arrow types: a dashed red arrow for 'Regulated Goods', a solid blue arrow for 'Money for Regulated Goods', and a dashed purple arrow for 'Order (cause the import to occur)'. Figure 6 Import Scenario #6 Who should be reporting the associated specified packaging? • Company A would be obligated to report the associated specified packaging if they are producers (s19(2) RSA) themselves as these regulated goods are brought into Singapore because of an order made by them, causing these to be brought into Singapore. • These regulated goods would be seen to have been imported by Company A in furtherance of their business of supplying regulated goods in Singapore. • Since Company C did not import these regulated goods in furtherance of their business of supplying these regulated goods to Company A i.e. Company C did not supply these imported regulated goods, they would not be obligated to report.

S/N	Activity & Specified packaging to be reported	Scenario
7	Regulated goods in specified packaging are supplied in Singapore by your company through an e-commerce platform. Your company imports and engages a logistic company to deliver these regulated goods in specified packaging to the consumers.  Specified packaging to be reported: Those associated with the imported regulated goods.	A consumer purchases regulated goods through Company C's e-commerce platform. These orders are conveyed to Company C's overseas supplier. Company C imports these regulated goods in specified packaging and arranges for the delivery of these regulated goods through a logistics company. The logistics company would deliver these regulated goods to the consumer.  Overseas Singapore Legend: - Regulated Goods (Red dotted arrow) - Money for Regulated Goods (Blue solid arrow) - Order (cause the import to occur) (Purple dashed arrow) - Money for delivery service (Green double-lined arrow) Figure 7 Import Scenario #7 Who should be reporting the associated specified packaging? Company C would be obligated to report the associated specified packaging as they imported these regulated goods.

S/N	Activity & Specified packaging to be reported	Scenario
8	Regulated goods in specified packaging are not supplied in Singapore by your company. Instead, consumers e.g. households deal directly with your company's HQ through their e-commerce platform. Your company's HQ engages a logistic company to import and deliver these regulated goods in specified packaging directly to the consumers. Your company does not partake in the supply or import of these regulated goods. Specified packaging to be reported: None, currently not covered under the scope of the MPR.	A consumer purchases regulated goods through Company C's HQ e-commerce platform. These orders are sent directly to Company C's overseas HQ which would arrange for the delivery of these regulated goods through a logistics company. The logistics company would import these regulated goods and deliver them to the consumer. Company C does not partake in the supply or import of these regulated goods. The diagram illustrates the flow of regulated goods and money in Import Scenario #8, divided into Overseas and Singapore sections by a vertical dashed line. Overseas: Contains 'Company C's HQ' (blue circle with person icon). Singapore: Contains 'Company C's HQ e-commerce platform' (blue circle with person icon), 'Consumer e.g. households' (orange circle with person icon), 'Logistics company' (green circle with person icon), and 'Company C' (blue circle with person icon). Legend: - Regulated Goods: Red dotted arrow - Money for Regulated Goods: Blue solid arrow - Order (cause the import to occur): Purple dashed arrow - Money for delivery service: Green double-lined arrow Flow Description: - Consumer e.g. households (1) places an order (purple dashed arrow) with Company C's HQ e-commerce platform. - Company C's HQ e-commerce platform (2) sends the order (purple dashed arrow) to Company C's HQ Overseas. - Company C's HQ Overseas (3) sends Regulated Goods (red dotted arrow) to the Logistics company. - The Logistics company (4) delivers the Regulated Goods to the Consumer e.g. households. - Company C's HQ Overseas (3) sends Money for delivery service (green double-lined arrow) to the Logistics company. - Company C's HQ e-commerce platform (1) sends Money for Regulated Goods (blue solid arrow) to Company C's HQ Overseas. Figure 8 Import Scenario #8 Who should be reporting the associated specified packaging? Not covered under the current scope of the MPR.

2.1.4

Definition of “Use”

- 1 Pack regulated goods into or with specified packaging or wrapping the regulated goods with specified packaging.
– s19 (2b(i) RSA)
E.g. Manufacturers, fillers/packers, retailers, supermarkets and F&B establishments.

- 2 Engage or cause another person to pack regulated goods into or with specified packaging or wrapping the regulated goods with specified packaging.
– s19 (2b(ii) RSA)
E.g. Companies that contract third-party companies to manufacture packaged goods or pack goods.

These do not include packaging that are done for or on behalf of a Singapore-connected person. The following additional criteria apply **ONLY** in the context of retailers³ or supply to retailers

- 3 Supply regulated goods to a retailer, provide the retailer with specified packaging and require the retailer to use the specified packaging when packaging or wrapping the regulated goods.
– s19 (2b(iii) RSA)
E.g. Company imports regulated goods, supplies them to retailers and also provides these retailers with designated packaging for packing the regulated goods.

- 4 If the company is a retailer and specified packaging is provided to a consumer who purchases regulated goods from the retailer to put the regulated goods into.
– s19 (2b(iv) RSA)
E.g. Retailers, supermarkets that provide packaging for consumers to pack their purchases within.

Companies may refer to the checklist in Appendix B to assess if they are required to comply with the Mandatory Packaging Reporting and for guidance as to what should be reported. Case studies are available in Appendix C to aid in identifying reporting obligations.

Source:

³ “Retailer” as defined through section 2(1) of the Resource Sustainability Act.

Scenarios 1 to 6 below detail the reporting obligations based on the more common “use” (s19(2b) RSA) related activities.

Each of the six scenarios mentions terms such as **empty packaging** and **packaging of the empty packaging**. Please refer to the content below for the explanation of what **empty packaging** and **packaging of empty packaging** are.

Note:

The scenarios below assume that there is no agreement between your company and another (e.g. specific instructions, contract, or engagement) to import and/or supply these regulated goods or to control the supply of regulated goods in Singapore in any way. If such an agreement exists, please consult NEA.

Empty Packaging and Packaging of the Empty Packaging

Empty packaging is unfilled packaging that have not yet served their packaging function. **Packaging of the Empty Packaging** are the packaging used to wrap up/pack empty packaging.

Please see the following two examples:

Carton boxes tied together with plastic wrap

PET bottles packed in a carton box

Now, using these examples above, let's look at a scenario with a few case studies below:

- Company X supplies carton boxes tied together with a plastic strap to Company Y.
- Company Y supplies PET bottles packed in a carton box to Company Z.
- Company Z fills up the PET bottles with beverage and sells it to consumers.

Assumption: The empty packaging is assumed to be generic (uncustomized) packaging for all packaging in the following case studies, unless stated otherwise.

Case Study #A : Company X is an overseas supplier.

Reporting Obligations

Company X	Company Y	Company Z
None.	 	
	Plastic Strap Carton Box	PET Bottle

Company X is an overseas supplier that supplies **Empty Carton Boxes** as **regulated goods** with Plastic Straps as specified packaging to Company Y.

Company Y imports **Empty Carton Boxes** as **regulated goods** with the Plastic Strap as its specified packaging. Hence, Company Y is obligated to report the Plastic Straps.

Company Y supplies **Empty PET Bottles** as **regulated goods** with the Carton Boxes as its specified packaging. Hence, Company Y is obligated to report the Carton Boxes.

Company Z supplies **beverages** as **regulated goods** with the PET Bottles as its specified packaging. Hence, Company Z is obligated to report the PET bottles.

Note: Empty packaging are to be reported as specified packaging when they are filled.

Case Study #B : Company X is a local supplier.

Reporting Obligations

Company X	Company Y	Company Z
		
Plastic Strap	Carton Box	PET Bottle

Company X supplies **Empty Carton Boxes** as **regulated goods** with the Plastic Strap as its specified packaging. Hence, Company X is obligated to report the Plastic Straps.

Company Y supplies **Empty PET Bottles** as **regulated goods** with the Carton Boxes as its specified packaging. Hence, Company Y is obligated to report the Carton Boxes.

Company Z supplies **beverages** as **regulated goods** with the PET Bottles as its specified packaging. Hence, Company Z is obligated to report the PET bottles.

Note: Empty packaging are to be reported as specified packaging when they are filled.

Case Study #C : Company X is a local supplier and Company Z requests for customised PET bottles from Company Y.

Reporting Obligations

Company X	Company Y	Company Z
	None.	 
Plastic Strap		Carton Box PET Bottle

Company X supplies **Empty Carton Boxes** as **regulated goods** with the Plastic Strap as its specified packaging. Hence, Company X is obligated to report the Plastic Straps.

Company Z requested from Company Y customised PET bottles as regulated goods. Hence, Company Z is obligated to report **all associated specified packaging** that comes from the **customised regulated goods**.

Company Z supplies **beverages** as **regulated goods** with the PET Bottles as its specified packaging. Hence, Company Z is obligated to report the PET bottles.

Note: Empty packaging are to be reported as specified packaging when they are filled.

Scenarios 1 to 6 below detail the reporting obligations based on the more common “use” (s19(2b) RSA) related activities. An assumption is made that your company’s supply chain comes from an overseas supplier (i.e. Case Study #A) in which all reporting obligation falls upon your company. However, each scenario has also stated exclusions on which packaging can be excluded from your reporting should you have sourced from a local supplier.

S/N	Activity	Specified packaging to be reported by your company
1	Manufacturing Your company produces or manufactures regulated goods and packs or wraps these in specified packaging	Specified packaging associated with the production or manufacturing of regulated goods such as: 1 Specified packaging of the raw materials 2 Specified packaging of the empty packaging that will be used (s19(2b) RSA) to pack or wrap the produced or manufactured regulated goods i.e. packaging of the empty packaging materials (Unless (1) or (2) were sourced from a local supplier that was not engaged to import, produce or manufacture these – in such cases, the local supplier would be reporting the associated specified packaging if they are producers (s19(2) RSA) themselves.) 3 The specified packaging of the manufactured regulated goods i.e. the empty packaging in (2) when they are filled

S/N	Activity	Specified packaging to be reported by your company
2	General packing/wrapping Your company packs or wraps regulated goods in specified packaging	Specified packaging associated with the regulated goods that are used (s19(2b) RSA) to pack or wrap the regulated goods such as: 1 Specified packaging of the empty packaging that will be used (s19(2b) RSA) to pack or wrap the regulated goods i.e. packaging of the empty packaging materials (Unless (1) was sourced from a local supplier that was not engaged to import, produce or manufacture these – in such cases, the local supplier would be reporting the associated specified packaging if they are producers (s19(2) RSA) themselves.) 2 The specified packaging used (s19(2b) RSA) to pack or wrap the regulated goods i.e. the empty packaging in (1) when they are filled

S/N	Activity	Specified packaging to be reported by your company
3	Contract manufacturing Engaging another company to produce or manufacture regulated goods on your behalf and to pack or wrap these in specified packaging	Specified packaging associated with the production or manufacturing of regulated goods such as: 1 Specified packaging of the raw materials 2 Specified packaging of the empty packaging that will be used (s19(2b) RSA) to pack or wrap the produced or manufactured regulated goods i.e. packaging of the empty packaging materials (Unless (1) or (2) were sourced from a local supplier that was not engaged to import, produce or manufacture these – in such cases, the local supplier would be reporting the associated specified packaging if they are producers (s19(2) RSA) themselves.) 3 The specified packaging of the manufactured regulated goods i.e. the empty packaging in (2) when they are filled

S/N	Activity	Specified packaging to be reported by your company
4	Contract packing Engaging another company to use (s19(2b) RSA) specified packaging by packing or wrapping regulated goods on your behalf	Specified packaging associated with the regulated goods that are used (s19(2b) RSA) to pack or wrap the regulated goods such as: 1 Original specified packaging of the regulated goods 2 Specified packaging of the empty packaging that will be used (s19(2b) RSA) to re-pack or re-wrap the regulated goods i.e. packaging of the empty packaging materials (Unless (1) or (2) were sourced from a local supplier that was not engaged to import, produce or manufacture these – in such cases, the local supplier would be reporting the associated specified packaging if they are producers (s19(2) RSA) themselves.) 3 The specified packaging used (s19(2b) RSA) to re-pack or re-wrap the regulated goods i.e. the empty packaging in (2) when they are filled

The additional “use (s19(2b) RSA)” requirements below are only applicable in the context of retailers or supply to retailers

S/N	Activity	Specified packaging to be reported by your company
5	Requiring retailers to pack or wrap regulated goods in specified packaging that you provide to them Your company supplies regulated goods to retailers and specified packaging (e.g. empty packaging) are provided to these retailers to use (s19(2b) RSA) in connection with their supply of the regulated goods (those that you supplied to them)	Additional specified packaging to be reported by your company: 1 Specified packaging of these empty packaging i.e. packaging of these empty packaging materials 2 The specified packaging that you provide to them to pack or wrap the regulated goods i.e. the empty packaging in (1) when they are filled Note: If it is not a Singapore registered company that supplies the regulated goods to retailers and provides the retailers with specified packaging to use (s19(2b) RSA) in connection with the retailer's supply of regulated goods, the specified packaging in (1) and (2) above should be reported by the retailer.

S/N	Activity	Specified packaging to be reported by your company
6	Retailers that provide specified packaging to consumers to pack or wrap their purchases Your company supplies regulated goods to consumers and specified packaging (e.g. empty packaging) are provided to these consumers to put their purchases within Or Your company supplies regulated goods to consumers and specified packaging (e.g. empty packaging) are used (s19(2b) RSA) to pack or wrap their purchases regardless if at point-of-sale or not	<u>Additional</u> specified packaging to be reported by your company: 1 Specified packaging of these empty packaging i.e. packaging of these empty packaging materials (Unless (1) was sourced from a local supplier that was not engaged to import, produce or manufacture these – in such cases, the local supplier would be reporting the associated specified packaging if they are producers (s19(2) RSA) themselves.) 2 The specified packaging that you provide to them to put their purchases within and/or those used (s19(2b) RSA) to pack or wrap their purchases i.e. the empty packaging in (1)

2.2

Goods covered under the Mandatory Packaging Reporting

Goods that are within the scope of the Mandatory Packaging Reporting (MPR) are referred to as “Regulated Goods”. Generally, all goods are within the scope of the MPR except the following, which are excluded from the current phase.

Note:

The Resource Sustainability Act (RSA) prescribes the requirements for the MPR scheme in Part 4 – Reporting In Relation To Packaging. The term “Regulated Goods” in Part 4 of the Act should not be confused with the term “Regulated Products” in Part 3 of the Act – Electrical and Electronic Waste.

The following goods are excluded from the definition of regulated goods.

- 1 Any machine, equipment, appliance or other device that is designed solely* for industrial or manufacturing usage or application (including commercial food processing or production) and any spare part, accessory or peripheral item designed for use with or in the equipment, appliance or device. E.g. Processing machineries, Industrial Palletizers and Conveyor Systems

Figure 9

Examples of Goods Seen as Machine, Equipment, Appliance or Other Device that is Designed Solely for Industrial or Manufacturing Usage or Application

*These goods must be designed solely for the purpose detailed above. Companies are advised to review their goods **objectively based on the design of the goods** and **not how they are being used by their customers or who they are supplying to**.

A machine may be used in an industrial or manufacturing setting. However, it should be reported if a machine is designed to be used for other purposes apart from those in the exclusion, such as use in laboratories for testing/measurement and commercial purposes.

Example: Supplying air-conditioner to industrial companies.

A company supplies air-conditioners exclusively to industrial customers in Singapore. The eligibility for exclusion is based on whether the air-conditioners have been designed solely for the purposes outlined in the exclusion, rather than on how they are used or to whom they are supplied.

Note:

The exclusion does not apply to consumables (e.g. filters and oils that are used with the associated goods excluded above) nor do they apply to parts, accessories or peripherals that are used in an industrial or manufacturing process to produce or assemble goods.

2 Any arms or explosives within the meaning of the Arms and Explosives Act (Cap. 13).

3 Any specified goods listed below and any spare part, accessory or peripheral item designed for use with or in:

a lift or an escalator

any sports or recreation equipment⁴

an aircraft⁵

a spacecraft

a vessel⁶

a motor vehicle⁷ that is neither a personal mobility device, power-assisted bicycle, motorised wheelchair nor mobility scooter within the meaning given by section 2(1) of the Active Mobility Act 2017 (Act 3 of 2017)

Source:

⁴ "Sports or recreation equipment" as defined through the Resource Sustainability Act (Packaging Reporting Regulations) 2020.

⁵ "Aircraft" as defined through the Resource Sustainability Act (Packaging Reporting Regulations) 2020.

⁶ "Vessel" as defined through the Resource Sustainability Act (Packaging Reporting Regulations) 2020.

⁷ "Motor vehicle" as defined through the Resource Sustainability Act (Packaging Reporting Regulations) 2020.

For clarity, the exclusion listed above in 3 does not apply to all spare parts, accessories or peripheral items. **ONLY** those designed solely to be used with or in the goods listed are excluded.

2.3

Packaging Covered Under the Mandatory Packaging Reporting

Packaging that are within the scope of the Mandatory Packaging Reporting (MPR) are referred to as “Specified Packaging⁸”. Generally, all types of packaging, regardless if they are for Business-to-Business or Business-to-Consumer are within the scope of the MPR except for the following, which are excluded from the current phase.

- 1 Those that remain in the possession of the company to be re-used for the containment, protection, handling, delivery or presentation of any goods
- 2 Packaging designed to be re-used by an end-user for the containment of any regulated goods that are none of the following:

any food or
beverage product

any vitamin and
health supplement

any medicinal
product

any cosmetic
product

any personal care or
hygiene product

any detergent or
cleaning agent

Generally, this means that all packaging designed to be re-used can be excluded unless those that are used for the purposes detailed in **2** above. E.g. even if a packaging of a cosmetic product is designed to be re-used, it would still have to be reported.

Source:

⁸ “Specified Packaging” as defined through section 19 (1) of the Resource Sustainability Act.

The following additional criteria applies **ONLY** in the context of retailers

- Any packaging provided by a retailer to a consumer⁹ who purchases regulated goods from the retailer, to enable the consumer to put the regulated goods into the packaging, is not packaging designed to be re-used by an end user. E.g. Carrier bags and crates designed to be re-used that are provided to consumers by the retailer, are not excluded.

- 3 The scope of the MPR is **not limited** to packaging that reaches the consumer. Both Business-to-Business and Business-to-Consumer packaging are within scope. There is, however, an exclusion where “packaging designed to facilitate the protection or handling of the regulated goods when transported in bulk but not presented or delivered to the consumer of the regulated goods”, are excluded from the current phase of the MPR. These may be included in the scope in the future.

Figure 10

Examples of Packaging Designed for the Purpose Detailed in the Exclusion No. 3 Above

Pallets used for bulk purposes

Bulk packaging fillers

“Bulk” is defined as multiple sales units¹⁰ or large volume content packaging (e.g. intermediate bulk containers and drums (200L & above). Refer to Appendix A for packaging designed for bulk purposes which include examples of specific packaging along with the conditions for them to be/not to be reported. The list is not exhaustive, and companies should consult NEA if any guidance is required in assessing whether a packaging fits the exclusion.

Source:

⁹ “Consumer” as defined through section 2(1) of the Resource Sustainability Act as an individual who purchases or intends to purchase the regulated goods for household use or private consumption.

¹⁰ What constitutes a sales unit is dependent on the producers (s19(2)) business of supplying regulated goods in Singapore. E.g. if a bundle of 10 regulated goods are supplied as a unit, it is likely that this bundle of multiple regulated goods constitutes a single sales unit. It does not refer to the quantity of regulated goods i.e. the 10 regulated goods, unless each regulated good is supplied as a single sales unit.

Example of “multiple sales units”

If customers purchase 10 units of regulated goods packed in a large carton box and each of these 10 units constitute a single sales unit i.e. customers are charged per unit, the large carton box may be excluded as long as they are not presented to a consumer by your company.

However, if 10 purchase units of regulated goods packed in a large carton box and these 10 units are supplied as a single sales unit i.e. customers are charged per bundle of 10 units, the large carton box does not fit the exclusion and would have to be reported.

Table 1: Example of single vs multiple sale units

If a **Single sales unit** is the **Pallet**
(i.e., All 10 carton boxes are a single sales unit)

**NEED TO BE
REPORTED**

- Pallet – to be reported
- **All** packaging materials within the pallet including those for the individual goods – to be reported.

If a **Single sales unit** is the **carton box** (i.e., Each of the 10 carton boxes are a single sales unit)

NEED TO BE REPORTED

DO NOT NEED TO BE REPORTED

If more than 1 sales unit on the pallet

- Pallet – do not have to be reported for now. However, this may be included in the future under the scope of the MPR.
- All packaging material on the pallet used for the multiple sales units (**i.e., one sales unit is a carton box**) – do not have to be reported if not presented or delivered to the consumer. However, this may be included in the future under the scope of the MPR.
- All packaging of the single sales unit (e.g., carton box and inner styrofoam cushion – to be reported.

If only 1 sales unit per pallet

- Pallet as well as all the packaging materials used for the goods on the pallet – to be reported.

Note:

There are plans to include such packaging under the scope of Mandatory Packaging Reporting in the future.

2.4

Summary of Goods and Packaging covered under the Mandatory Packaging Reporting

Figure 11
Summary of Regulated Goods and Specified Packaging

Except those listed below,
which are **excluded**:

Any machine, equipment, appliance or other device that is **designed solely** for industrial or manufacturing usage or application (including commercial food processing or production) and any spare part, accessory or peripheral item designed for use with or in the equipment, appliance or device.

Examples: Processing machineries, Industrial Palletizers and Conveyor Systems

Any arms or explosive within the meaning of the Arms and Explosive Act (Cap. 13)

a lift or an escalator

any sports or
recreation equipment

an aircraft

a spacecraft

a vessel

a motor vehicle that is neither a personal mobility device, power-assisted bicycle, motorised wheelchair nor mobility scooter within the meaning given by section 2(1) of the Active Mobility Act 2017 (Act 3 of 2017)

And any spare part, accessory or peripheral item **designed for use** with or in the goods listed in this box.

All material and form of packaging regardless of application should be reported, even if they are:

Business-to-Business (B2B)

Business-to-Consumer (B2C)

Except those listed below, which are **excluded**:

Packaging designed to facilitate the protection or handling of the regulated goods when transported in bulk

e.g. those used in relation to multiple sales units or bundle multiple sale or purchase units together

Those that remains in your procession to be re-used

Packaging designed to be re-used by an end user for the containment of any regulated goods, other than the following which shall be reported:

Packaging for:

any food or beverage products

any vitamin and health supplements

any medicinal products

any cosmetic products

any personal care or hygiene products

any detergent or cleaning agents

(For retailers) Packaging provided to consumer to enable them to put regulated goods into packaging such as reusable bags.

Packaging used for the purposes listed in this box will have to be reported even if they are designed to be re-used.

Reports to be Submitted Under the Mandatory Packaging Reporting

The reporting portal will be opened for annual submission from 1 January till 31 March of every reporting year. During this period, companies will be able to log in, register and submit or edit their submission. To determine if your company is required to report during a specific reporting year ($T + 2$) with the packaging data of year ($T + 1$), companies should refer to their annual turnover in year (T). The packaging data to be reported in year ($T + 2$) must cover the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) during the entire year, January to December of ($T + 1$). This is to be repeated as long as the company fits the definition of a producer and meets the prescribed threshold requirement.

For example:

For the inaugural MPR reporting cycle, obligated companies who met the prescribed threshold requirement of an annual turnover exceeding \$10 million (SGD) in year **2020 (T)** will have to begin the collection of their packaging data for the year **2021 (T+1)** which is to be submitted in year **2022 (T+2)**.

Annual Turnover	Annual turnover of the year 2020 (01 January - 31 December)
Packaging data collection (T+1)	To be collected for year 2021 (01 January - 31 December)
Submission of reports (T+2)	To be submitted in 2022 (01 January - 31 March)

Figure 12
Mandatory Packaging Reporting Cycle

Companies will be required to submit the following reports to NEA annually from 1 January to 31 March through NEA's Waste and Resource Management System (WRMS) starting from 2022. A link to the portal can be accessed at <https://wrms2.nea.gov.sg>. Guidance on interfacing with the Mandatory Packaging Reporting (MPR) module in the WRMS portal is available in Appendix D.

- 1 Annual reports stating the material, weight and form of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) in furtherance of the business of supplying regulated goods in Singapore (incl. specified packaging of the actual regulated goods supplied). Specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) in relation to regulated goods that the obligated producer knows have been exported that year or are to be exported, can be excluded.

The table below provides guidance on whether producers are required to report such import (s19(2a) RSA) or use (s19(2b) RSA). Note that the table is not exhaustive and there would be a need to report all associated specified packaging of regulated goods that furthers the business of supplying regulated goods in Singapore.

Table 2: Examples of Specified Packaging Imported (s19(2a) RSA) or Used (s19(2b) RSA) in Furtherance of the Business of Supplying Regulated Goods

No.	Item	To be reported?
1	Specified packaging of the regulated goods that are supplied or for supply in Singapore	Yes
2	Specified packaging of raw materials used to produce/manufacture regulated goods Note: In cases where a portion of these are used to produce regulated goods which are exported or are to be exported, companies may approximate the quantity of these used to produce those which are to be exported or are to be exported and omit them from the packaging report.	Yes, if the finished goods are to be supplied in Singapore
3	Specified packaging of regulated goods which have failed quality control or which are otherwise damaged or expired	Yes
4	Specified packaging of regulated goods supplied through Free Trade Zones (FTZ)/Duty Free Zones unless transhipped	Yes
5	Specified packaging of regulated goods supplied through online retailers or channels	Yes

No.	Item	To be reported?
6	Spare part, accessory or peripheral item not designed for use with or in specified goods ¹¹ or list of excluded goods	Yes
7	Specified packaging of regulated goods that are given to customers as samples, test and trial units	Yes
8	Specified packaging of regulated goods that are distributed during events e.g. bottled water that are imported and given to customers during a new product launch	Yes
9	Specified packaging of regulated goods that are exported that year or are to be exported or transhipped	No
10	Specified packaging of regulated goods for your company's own internal cleaning, internal pantry or premises use, internal maintenance, internal storage, uniform and internal training	No
11	Specified packaging of credit and membership cards	No

Note: Regulated goods with specified packaging purchased directly through a local distributor that was not engaged to import (s19(2a) RSA) or use (s19(2b) RSA) the specified packaging on behalf of the company do not have to be reported as these would be reported by the local distributor.

- 2 Methodology document detailing how the packaging figures in annual reports detailed in S/N 1 (page 36) were derived and computed
- 3 Develop 3R plans for any packaging in Singapore:

Packaging Reduction

Packaging Collection for Reuse

Packaging Collection for Recycling

Consumer Outreach related to Packaging 3Rs

Industry Outreach related to Packaging 3Rs

Use of Recycled Content in Packaging Material

Improving Recyclability of Packaging

Source:

¹¹ "Specified goods" as defined through the Resource Sustainability (Packaging Reporting) Regulations 2020 or detailed as excluded in Chapter 2.2.

Do note that these plans must be developed for packaging in Singapore. As long as the prescribed 3R plans above are applied to any packaging in Singapore (not limited to specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) in furtherance of the business of supplying regulated goods in Singapore), they can be submitted. This even includes plans for packaging within the company's premises or those that are excluded from the packaging data reporting.

Companies may refer to the checklist in Appendix B to assess if they are required to comply with the Mandatory Packaging Reporting and for guidance as to what should be reported. Case studies are available in Appendix C to aid in identifying reporting obligations.

Franchisor/Franchisee relationships

A Singapore-registered franchisor has the obligation to report for all its franchisees as a group if the business meets the definition of a producer, and the sum of all franchisees' annual turnovers meets the prescribed threshold. However, if the franchisor is not registered in Singapore, each franchisee is responsible to report individually as long as they are individually registered in Singapore and meet the prescribed threshold requirement of an annual turnover exceeding S\$10 million.

Group reporting

Group reporting is not allowed. Business entities that are individually registered in Singapore and have met the reporting requirements are to report on the specified packaging (including packaged goods) imported (s19(2a) RSA) or used (s19(2b) RSA).

Sales or Supply of goods between related business entities under the same group of company/companies

For cases where two or more individually registered companies in Singapore that are under the same group of company/companies supply goods to one another, they would still have to report on the specified packaging (including packaged goods) imported (s19(2a) RSA) or used (s19(2b) RSA) individually. There is no exclusive condition catered for such companies to allocate their reporting obligations to one another.

3.1

Companies are required to fill in their packaging data using the Packaging Data Reporting Excel Template provided by NEA, which can be accessed at <http://www.nea.gov.sg/packaging>. The packaging data to be reported in year (T + 2) must cover the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) during the entire year, January to December of (T + 1).

Figure 13 — Packaging Data Reporting Excel Template

[illegible]

Figure 14 —
Company Name, Reporting Period and Annual Turnover

Company Name:				
Reporting Period:	1/1/2021	to	31/12/2021	
Annual Turnover:				

Packaging Material	Packaging Form	Further Details	Weight (kg)	Remarks

Companies are to fill the packaging data reporting template with:

Company Name

- Indicate your Singapore registered company's full name
- Entry should be the same as per what was submitted through the online reporting portal during registration

Reporting Period

- Pre-filled in downloadable excel spreadsheet template based on calendar year (e.g. 1 January 2021 to 31 December 2021)
- Specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) during this reporting period (e.g. 1 January 2021 to 31 December 2021) should be reported in the following year (e.g. 2022)*
- Refer to the year which the packaging reported is imported (s19(2a) RSA) or used (s19(2b) RSA)

Annual Turnover

- Companies are required to declare their annual turnover which would be used in determining if they have met the prescribed threshold criteria

***The packaging data collected for the reporting period is not based on when the regulated goods are supplied but instead, when they were imported or used (e.g. filled).**

Figure 15 — Packaging Material, Packaging Form, Further Details, Weight and Remarks

Company Name:				
Reporting Period:	1/1/2021	to	31/12/2021	
Annual Turnover:				
Packaging Material	Packaging Form	Further Details	Weight (kg)	Remarks

Packaging Material

- Material of the packaging (e.g. plastic, paper, metal, glass)

Packaging Form

- Physical form of the packaging (e.g. carrier bag, beverage bottle/carton)

Further Details

- Details of the packaging material (e.g. PET, Aluminium)

Weight

- Overall weight of the packaging imported (s19(2a) RSA) or used (s19(2b) RSA) for the packaging material and form in the reporting period
- Value to be reported should be to the nearest whole number

Remarks

- Additional comments can be shared here (e.g. If the reported packaging is re-used or made of recycled content)

Companies are to identify components of the packaging according to the different materials and forms and compute the weight of each material and form. These are to be selected through a drop-down list. All fields except “Remarks” and “Further Details” are mandatory. Companies may face difficulties when uploading their Packaging Data Reporting Excel Template if there are missing fields or if the packaging material, form and further details are not selected through drop-down list and instead, filled directly. Companies are strongly advised against reusing the Packaging Data Reporting Excel Template from past submissions. Instead, kindly download a new Packaging Data Reporting Excel Template for each new reporting period.

Packaging to be reported by companies should be categorised and entered into the Packaging Data Reporting Excel Template by following the drop-down options in the table below. For those which are not directly identifiable through the options listed below, companies are advised to select the closest possible option.

Table 3: Drop-down options

Packaging Material	Packaging Form	Further Details
Composite	Beverage carton	-
	Packs/Sachets	
	Product packaging (excluding beverage carton, packs/sachets)	
	Others	
Glass	Beverage bottle	Brown
	Product packaging (excluding beverage bottle)	Clear
	Others	Green Other colours
Metal	Beverage can	Aluminium
	Disposables (foils, trays)	Steel
	Food can	Tin
	Product packaging (excluding beverage can, food can)	Others
	Others	

Table 3: Drop-down options

Packaging Material	Packaging Form	Further Details
Paper	Carrier bag	Corrugated board Paper Paperboard Others
	Disposables (bowls, boxes, cups, plates, trays)	
	Product packaging	
	Transport and protective packaging	
	Others	
Plastic	Beverage bottle	EPS HDPE LDPE PET PP PS PVC Others
	Carrier bag	
	Disposables (bowls, boxes, covers, cups, plates, trays)	
	Product packaging (flexible)	
	Product packaging (rigid, excluding beverage bottle)	
	Transport and protective packaging	
Wood	Crate	NA
	Transport and protective packaging	
	Pallet	
	Product packaging	
	Others	
Others	Carrier bag	Biodegradable/ compostable Oxo-degradable/ oxo-biodegradable Others
	Others	

Examples of filling the packaging data reporting template

Example 1 (a): Glass beverages bottles packed into carton carriers

Figure 16

Example of filling the Packaging Data Reporting Excel Template (1)

Company Name:	ND Brewery Pte Ltd			
Reporting Period:	1/1/2021	to	31/12/2021	
Annual Turnover:	\$20,000,000			
Packaging Material	Packaging Form	Further Details	Weight (kg)	Remarks
Metal	Others	Aluminium	800	Aluminium bottle caps
Plastic	Others	LDPE	200	LDPE layer placed underneath aluminium bottle caps
Plastic	Others	LDPE	150	Plastic labels placed on neck of bottles
Glass	Beverage bottle	Green	1900	Bottles are made from 100% recycled glass
Paper	Product packaging	Paperboard	1200	Carton carriers, each designed to hold 4 bottles. Made of 40% recycled paper

In this example, multiple glass beverage bottles, each with an aluminium cap with LDPE under layer and a plastic label on the neck of the glass bottle are packed into a carton carrier.

Companies need to identify the components of the specified packaging according to the different specified packaging material, packaging form, and by selecting from the list under “Further Details”. They must compute the weight of each specified packaging material and corresponding packaging form. Companies can use the remarks column to share additional information.

Table 4: Example of Options to Select Based on Example 1(a)

	Packaging Material	Packaging Form	Further Details
Aluminium cap with LDPE under layer	Metal	Others (Since “Cap” is not one of the options)	Aluminium
	Plastic	Others	LDPE
Plastic label	Plastic	Others	LDPE
Glass bottle	Glass	Beverage bottle	Green
Carton carrier	Paper	Product packaging	Paperboard

Example 1 (b):

Glass beverages bottles are packed into carton carriers with promotion label on each bottle.

Specified packaging components that have the same material and form can be aggregated and reported together. Using a similar example, this time, each bottle has a plastic label placed at the body.

Figure 17

Example of filling the Packaging Data Reporting Excel Template (2)

Packaging Form	Further Details	Weight (kg)	Remarks
Others	Aluminium	800	Aluminium bottle caps
Others	LDPE	200	LDPE layer placed underneath aluminium bottle caps
Others	LDPE	300	1. Plastic label placed on neck of bottles 2. Plastic label placed on body of bottles as part of promotion campaign
Beverage bottle	Green	1900	Bottles are made from 100% recycled glass
Product packaging	Paperboard	1200	Carton carriers, each designed to hold 4 bottles. Made of 40% recycled paper

Since both labels at the body and neck of the bottle are plastic labels, they can be reported together along with their combined weight.

Example 2:

Keyboard that is assembled using various individually packed components

Figure 18

Example of Regulated Goods

Keyboard A (left) assembled using
keycaps A (right)

Keyboard B (left) assembled using
keycaps B (right)

In this example, multiple individually packed components are used for assembling two different keyboard models.

Certain products may be assembled using various components that may be individually packaged within similar or different specified packaging.

Some of these components may be similar in sizes, shapes e.g. keycaps of keyboards. If these components are packed within the same specified packaging material and form, the weight of the specified packaging used to contain a single component can be multiplied by the total number of these components within the product (e.g. Keyboard A) and used for other similar products as well (e.g. Keyboard B) to obtain the total specified packaging weight for these components.

Consider 3 distinct components used as parts of the keyboards:

Table 5: Components of the Regulated Goods in Example (2)

Component	No. of Varying Types	Overall Component Quantity
Keycaps	2	$104 \times 2 = 208$
Integrated chips	2	$1 \times 2 = 2$
Screws	5*	$5 \times 4 \times 2 = 40^*$

*5 different types of screws with 4 used for each model of keyboard (i.e. Keyboard A and Keyboard B)

Table 6: Keycaps - Components of the Regulated Goods in Example (2)

Component	No. of Varying Types	Overall Component Quantity
Keycaps	2	$104 \times 2 = 208$

If each keycap for a keyboard model has the same packaging material and form as another model, the weight of the specified packaging for one keycap can be considered the same as the weight of the packaging for all other keycaps. This weight can be used to compute the overall specified packaging weight for this component in both models.

3.2 Methodology Document

Companies are required to provide details on how the packaging information submitted were derived and computed. In order to offer flexibility to companies due to the varying sources of information relating to the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA), no specific methodologies or templates has been prescribed. Flexibility is given to companies to adopt their own methodology. The methodology should minimally detail the information below:

- 1 Name & UEN of your company or the company you are preparing the methodology on behalf of
- 2 Source document referenced to when obtaining the material, form and weight of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA)
- 3 Source document referenced to when obtaining the quantity of the specified packaging in (2) above to derive the total weight of specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA)
- 4 Statistical or mathematical approaches adopted in estimating the information in (2) and (3) above (if any)

Source of individual packaging weight			Source of amount of packaging supplied to Singapore
1	Physically weigh the packaging	Multiply by:	• Production reports • Inventory reports • Import records • Invoices • Purchasing reports
2	Obtain packaging information from suppliers		
3	Internal specification records (e.g. Bill of materials)		

There is no prescribed methodology that must be adopted by companies. This is to provide companies the flexibility as to how the annual packaging volume supplied into the Singapore market can be calculated.

The methodology used to calculate the packaging data submitted must be included as part of the annual submission. Both the packaging data/reports and methodology are subject to audits by NEA.

3.3

3R (Reduce, Reuse, Recycle) Plan

Companies are required to develop and submit 3R plans as part of the Mandatory Packaging Reporting (MPR). Each plan shall have a timeline of 3 years (from the submission year) or shorter. A minimum of one ongoing plan must be maintained by your company. Companies may adopt any of the 3R plans listed below:

Table 7: Prescribed 3R plans

Type of Improvement Plan	Key Performance Indicator (KPI)	Example
Packaging Reduction	Percentage of packaging weight reduced per SKU (unit = %)	Weight reduction of packaging used to contain products produced
	Percentage of packaging weight reduced for each unit of packaging (unit = %)	Re-use of crates used to supply products to customer
	Total amount of packaging reduced per \$mil annual turnover (unit = kg/\$mil)	Packaging take-back programme where customers can return packaging in exchange for incentives
	Number of pieces of packaging reduced per sales transaction (unit = no./transaction)	Engaging customers at point of sales on how to recycle the products they purchase

Table 7: Prescribed 3R plans

Type of Improvement Plan	Key Performance Indicator (KPI)	Example
Packaging Collection for Reuse	Amount of packaging reused as a percentage of the amount of packaging placed on market (unit = %)	Engaging business partners through seminars with the topic of 'Improving product recyclability'
	Amount of packaging reused per \$mil company annual turnover (unit = kg/\$mil)	Redesigning the packaging used to pack products produced by increasing use of recycled content
Packaging Collection for Recycling	Amount of packaging recycled as a percentage of the amount of packaging placed on market (unit = %)	Redesigning the packaging used to pack products produced by reducing packaging layer
	Amount of packaging recycled per \$mil company annual turnover (unit = kg/\$mil)	Weight reduction of packaging used to contain products produced
Consumer Outreach related to Packaging 3Rs	Number of events held per year (unit = no./year)	Re-use of crates used to supply products to customer
	Number of people engaged per year (unit = no./year)	Packaging take-back programme where customers can return packaging in exchange for incentives
Industry Outreach related to Packaging 3Rs	Number of events held per year (unit = no./year)	Engaging customers at point of sales on how to recycle the products they purchase
	Number of people engaged per year (unit = no./year)	Engaging business partners through seminars with the topic of 'Improving product recyclability'
Use of Recycled Content in Packaging Material	Percentage increase in recycled content (unit = %)	Redesigning the packaging used to pack products produced by increasing use of recycled content
Improving Recyclability of Packaging	Reduction in number of packaging materials used per product (unit = no.)	Redesigning the packaging used to pack products produced by reducing packaging layer

Do note that these plans are to be developed for packaging in Singapore.

Should you require any guidance on developing 3R plans, you may refer to the various packaging reduction initiatives that were initiated by signatories of the Singapore Packaging Agreement (SPA)¹². The participants of the SPA awards were able to minimise their packaging footprint and reap cost savings associated with their initiative to reduce packaging and/or packaging waste. SPA case studies can be accessed through <https://www.nea.gov.sg/programmes-grants/schemes/singapore-packaging-agreement>.

You may also refer to the 3R packaging resource guidebook that was developed as part of the Packaging Partnership Programme (PPP) for obligated companies under the MPR framework, as well as companies/organisations seeking to reduce their packaging or packaging waste. The 3R resource guidebook can be accessed through <http://www.packaging-partnership.org.sg/resources/3r-guidebook-packaging>.

Source:

¹² With the end of the SPA on June 2020, the Packaging Partnership Programme aims to continue providing support to companies in their journey towards more sustainable packaging waste management.

Keeping of Records

Records should be kept for a period of no less than 5 years and should be presented upon request to NEA for audits and verification. These records include documents that relate to the specified packaging imported (s19(2a) RSA) or used (s19(2b) RSA) that were reported, the methodology and the 3R plans.

Common examples of such documentations include:

Supporting documents that show how packaging quantities imported (s19(2a) RSA) or used (s19(2b) RSA) less those that were exported or transhipped such as:

- 1 Import/export receipts/custom declaration and summary
- 2 Packaging specification with packaging weight information
- 3 Inventory records

Supporting documents that show progress of implementation of 3R plans

- 1 Specification for old and new packaging
- 2 Amount of packaging collected for reuse or recycling
- 3 No. of people or companies engaged through outreach activities
- 4 No. of outreach events

Penalties for Non-Compliance

NEA takes a serious view on non-compliance and will enforce against companies or individuals that contravene the Resource Sustainability Act (RSA).

Section of RSA	Provision	Offence
20(4)	Failure to submit a report relating to the specified packaging that is imported (s19(2a) RSA) or used (s19(2b) RSA)	(a) First conviction: Fine not exceeding \$5,000 (b) Second or subsequent conviction: Fine not exceeding \$10,000 or to imprisonment for a term not exceeding 3 months or to both (c) In the case of a continuing offence: Further fine not exceeding \$1,000 for every day or part of a day during which the offence continues after that second or subsequent conviction
21(3)	Failure to submit a plan to reduce, re-use or recycle packaging in Singapore	(a) First conviction: Fine not exceeding \$5,000 (b) Second or subsequent conviction: Fine not exceeding \$10,000 or to imprisonment for a term not exceeding 3 months or to both (c) In the case of a continuing offence: Further fine not exceeding \$1,000 for every day or part of a day during which the offence continues after that second or subsequent conviction

Section of RSA	Provision	Offence
22(3)	Failure to comply with Agency's direction: (a) to rectify or re-compute any matter in the report or plan as the Agency may require (b) to resubmit the report or plan to the Agency	(a) First conviction: Fine not exceeding \$5,000 (b) Second or subsequent conviction: Fine not exceeding \$10,000 or to imprisonment for a term not exceeding 3 months or to both (c) In the case of a continuing offence: Further fine not exceeding \$1,000 for every day or part of a day during which the offence continues after that second or subsequent conviction
23(3)	Failure to : (a) keep records mentioned in 23 (1) for at least 5 years (b) make records available for inspection upon request by an authorised officer (c) give records, documents or information other than the records mentioned in 23(1) to the Agency	(a) First conviction: Fine not exceeding \$5,000 (b) Second or subsequent conviction: Fine not exceeding \$10,000 or to imprisonment for a term not exceeding 3 months or to both (c) In the case of a continuing offence: Further fine not exceeding \$1,000 for every day or part of a day during which the offence continues after that second or subsequent conviction

Mandatory Packaging Reporting Administrative List

Note:

The purpose of this document is to provide guidance on common items of packaging* and whether producers are required to report such import or use under Part 4 of the Resource Sustainability Act. It is a non-exhaustive list and serves as a guidance to the industry. Companies are strongly encouraged to consult NEA for any clarifications. In the event of inconsistency between this list and the Resource Sustainability Act, the Resource Sustainability Act will prevail.

*Defined as “any material or combination of materials used for the containment, protection, handling, delivery or presentation of any goods, but **does not** include any material that remains in the possession of a producer of specified packaging to be re-used for the containment, protection, handling or delivery or presentation of any goods”. Please note that packaging which is sold as products e.g. carton boxes are not considered packaging. Instead, they are considered “Regulated Goods”.

If in doubt, please consult packaging@nea.gov.sg.

S/N	Image	Material	Is this specified packaging to be reported?
1		Labels and Stickers (excluding those that are placed on goods at the point of sale)	Yes
2		Scotch tape used to seal boxes excluding core	Yes
3		Inner core	No

S/N	Image	Material	Is this specified packaging to be reported?
4		Strapping band, cable tie	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
5		Hanger	No
6		Kraft paper commonly placed between goods and trays as well as for food	Yes

S/N	Image	Material	Is this specified packaging to be reported?
7		Trays that are used to contain food products which are commonly used by caterers	Yes
8		Trays that are commonly made of plastic or paper that are packed with food products	Yes
9		Compact case	No (possibly included in the future)

S/N	Image	Material	Is this specified packaging to be reported?
10		Lipstick tube	No
11		Eyeshadow palette	No (possibly included in the future)
12		Pen casing	No

S/N	Image	Material	Is this specified packaging to be reported?
13		Tea bag	No
14		Coffee capsule	No
15	No image	Moon cake packaging	Yes

S/N	Image	Material	Is this specified packaging to be reported?
16		CD casing and sleeve	No
17		Plant pot/vase	Yes
18		Pre-filled syringe	No (possibly included in the future)

S/N	Image	Material	Is this specified packaging to be reported?
19		Pre-filled ampoule	No (possibly included in the future)
20		Pre-filled vial (up to 100ml)	No (possibly included in the future)
21		Spray cans containing aerosols	Yes

S/N	Image	Material	Is this specified packaging to be reported?
22		Packaging inner support/ compartment	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
23		Bulk packaging fillers (e.g. packing peanuts, air pillows, cushions that are used as fillers in bulk packaging)	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
24		Drum (200L and above)	Yes, only if presented or delivered to the consumer of the goods

S/N	Image	Material	Is this specified packaging to be reported?
25		Small drum	Yes
26	No Image	Intermediate Bulk Container (IBC)	Yes, only if presented or delivered to the consumer of the goods
27		Jerrican	Yes

S/N	Image	Material	Is this specified packaging to be reported?
28		Carboy	Yes
29		Pallets incl. collars and plates used with pallets	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
30		Bucket with/without lid	Yes

S/N	Image	Material	Is this specified packaging to be reported?
31	No Image	Shrink/Stretch Wrap/ Stretch Hood	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
32	No Image	ISO Tank	Yes, only if presented or delivered to the consumer of the goods
33		Shipping container	Yes, only if presented or delivered to the consumer of the goods

S/N	Image	Material	Is this specified packaging to be reported?
34		Refillable cylinder	No
35	No Image	Bulk bag (incl. flecon)	Yes, only if presented or delivered to the consumer of the goods
36		Carrier Bag	Yes (e.g. if provided by a retailer to enable consumers to put goods within)

S/N	Image	Material	Is this specified packaging to be reported?
37		Reusable bag	Yes (e.g. if provided by a retailer to enable consumers to put goods within)
38		Bottles including cap	Yes
39		Soap & Shampoo bottle	Yes

S/N	Image	Material	Is this specified packaging to be reported?
40		Food container including cover	Yes
41		Beverage can	Yes
42		Beverage cup	Yes

S/N	Image	Material	Is this specified packaging to be reported?
43		Small trolley (given to consumer when purchasing bulky items)	No
44		Inhaler and Turbuhalor casing	No
45	No Image	Inhaler cartridge	Yes

S/N	Image	Material	Is this specified packaging to be reported?
46	No Image	Can ties and banding wrapper	Yes
47		Promotional booth	No
48		Vacuum seal bag	Yes

S/N	Image	Material	Is this specified packaging to be reported?
49		Ribbon	Yes
50		Basket used to pack goods within such as hampers	Yes
51		Carton box for logistical purposes	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods

S/N	Image	Material	Is this specified packaging to be reported?
52		Small carton box/tray that forms a single sales unit e.g. contains multiple beverage cans	Yes
53		Clam shell packaging	Yes
54		Pouch	Yes

S/N	Image	Material	Is this specified packaging to be reported?
55		Drink carton	Yes
56		Tin	Yes
57		Board/Slip sheet	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods

S/N	Image	Material	Is this specified packaging to be reported?
58		Sack	Yes
59		Display tray	No
60	No Image	Container liners commonly used to cover the inside of shipping containers	Yes, only if presented or delivered to the consumer of the goods

S/N	Image	Material	Is this specified packaging to be reported?
61	No Image	Flexi tank	Yes, only if presented or delivered to the consumer of the goods
62		Pail	Yes
63		Tub	Yes

S/N	Image	Material	Is this specified packaging to be reported?
64	No Image	Box sleeves	Yes
65		Crate	Yes, unless it is used in relation to multiple sales units and not presented or delivered to the consumer of the goods
66		Barrel	Yes

S/N	Image	Material	Is this specified packaging to be reported?
67		Plastic box (Reusable)	Yes (e.g. if provided by a retailer to enable consumers to put goods within)
68		Blister packaging	Yes
69		Desiccant	Yes

S/N	Image	Material	Is this specified packaging to be reported?
70		Canister	Yes
71		Manual and leaflets regardless if they are used in relation to the regulated goods or not	No
72		Tags attached as part of apparels	No

S/N	Image	Material	Is this specified packaging to be reported?
73	No Image	Taping Reel incl. packaging strip (e.g. Taping reel to contain electrical components)	Yes, only if presented or delivered to the consumer of the goods

Mandatory Packaging Reporting

Guide on assessing if a company is required to comply with the regulation

Please review this section before proceeding to the checklist:

- 1 The purpose of this document is to provide guidance to the industry and help companies to identify if they are required to comply with the Mandatory Packaging Reporting obligations under Part 4 of the Resource Sustainability Act 2019 and Resource Sustainability (Packaging Reporting) Regulations 2020. This document serves as a set of guidelines and companies are strongly encouraged to consult NEA for any clarifications.
- 2 In the event of inconsistency between this document and the legislation, the legislation will prevail. The legislation can be accessed at <https://www.nea.gov.sg/packaging>.

Are you a “Producer” of Specified Packaging?

1 Do you supply goods within the definition of s(19) of the Resource Sustainability Act 2019 (RSA)?
Supply includes:

- a) Supply by way of sale (including by barter or exchange), lease, loan, hire, or hire-purchase
- b) The supply of goods by retail or by wholesale
- c) The supply of goods in connection with any agreement
- d) The offer to supply goods or exposure of the regulated goods for supply

Yes → Next question

No → Not a Producer

2 Are any of the goods supplied considered “Regulated Goods”?
Regulated Goods means all goods except goods stated in Chapter 2.2.

Yes → Next question

No → Not a Producer

3 Do you carry on a business of supplying Regulated Goods in Singapore?

Yes → Next question

No → Not a Producer

4 Do you in furtherance of that business import Specified Packaging? Import includes:

- The actual importing of such Specified Packaging by importing Regulated Goods that have been packed into or wrapped with Specified Packaging
- Causing the import of such Specified Packaging by importing Regulated Goods that have been packed into or wrapped with Specified Packaging; but does not include Specified Packaging which are to be taken out of Singapore on the same conveyance which they are brought to Singapore without any landing or transhipment within Singapore.

(Refer to Appendix A for a list of examples of Specified Packaging)

Yes → A Producer

No → Next question

Are you a “Producer” of Specified Packaging?

5

Do you in furtherance of that business use Specified Packaging in any of the following ways?

- a) **Use 1:** You pack the Regulated Goods into or with Specified Packaging or wrap the Regulated Goods with Specified Packaging
- b) **Use 2:** Another party packs or wraps the Regulated Goods for you or on your behalf into or with Specified Packaging
- c) **Use 3:** You supply the Regulated Goods to a retailer by providing Specified Packaging to the retailer, and you require the retailer to use the Specified Packaging in connection with the retailer’s supply of Regulated Goods
- d) **Use 4:** You are a retailer, and you provide the Specified Packaging to a consumer who purchases Regulated Goods from you, which enables the consumer to put the Regulated Goods into the Specified Packaging

Yes —————> Next question

No —————> Not a Producer

6

Do you **only** engage in Use 1 (and not in Use 2-4), and do so **only** for or on behalf of a Singapore connected person?

Yes —————> Not a Producer

No —————> Next question

7

Are you a retailer who is required to use the Specified Packaging in Use 3, and you do not engage in Use 1,2 and 4?

Yes —————> Not a Producer

No —————> A Producer

If you are a Producer, do you have to fulfil the requirements stated in s20-23 of the RSA?

1

Is your annual turnover more than S\$10 million in a Year T?
(Annual turnover means the gross revenue received by the producer in respect of the producer's business in Singapore, whether in relation to the supply of regulated goods or otherwise)

No → See question 2a

Yes → See question 3a

2a

Are you the franchisor of a franchise?

No → No need to fulfil the requirements stated in s20-23 of the RSA.

Yes → See next question

2b

Is the annual turnover of all the franchisees of the franchise more than S\$10 million?

No → No need to fulfil the requirements stated in s20-23 of the RSA.

Yes → You will need to fulfil the requirements stated in s20-23 of the RSA on behalf of all the franchisees.

3a

Are you the franchisee of a franchise?

No → You will need to fulfil the requirements stated in s20-23 of the RSA.

Yes → See next question

3b

Is the franchisor of the franchise a Singapore-connected person?

No → You will need to fulfil the requirements stated in s20-23 of the RSA.

Yes → No need to fulfil the requirements stated in s20-23 of the RSA.

Case Study #1

Company G is an importer and manufacturer of garments. They supply these goods through their various retail stores in Singapore. They manufacture and are the brand owner of their locally produced goods. They also import goods from other suppliers.

These goods are unpacked from their individual packaging and placed on display in stores for purchase. Carrier bags are also provided for customers to bag their purchase. Apart from facilitating sales physically, goods are also sold through their online platform. Goods purchased from their online platform are from both their local and overseas suppliers.

In addition, Company G organises regular exhibitions where packaged goods are packed in tote bags and handed out as door gifts.

Company G is a producer and has to report packaging based on the following activities:

Table 9: Activity and Specified Packaging to be reported for Case Study 1

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of garments	Packaging of imported garments	19(2)(a)
2	Manufacturing of garments of own brand	Packaging of garments	19(2)(b)(i)
3	Providing carrier bags to consumers	Carrier bags	19(2)(b)(iv)
4	Supplying garments via online channels	Packaging of garments including transport packaging for supply to consumers	19(2)(a) and 19(2)(b)(i)
5	Providing regulated goods as door gifts packed in tote bags	Tote bags	19(2)(b)(i)

Case Study #2

Entity A under Company Y acts as a wholesaler that focuses on the sales of goods packaged in bulk. These are imported as well as purchased from local suppliers and are supplied through both business-to-business (B2B) and business-to-consumer (B2C).

Entity B under Company Y manages a chain of supermarkets supplying household goods.

The company's B2C operations involve packaging these goods into carrier bags for their customers or delivering the goods to their customers.

Company Y serves as the headquarters and only manages the financial aspects of the company as a whole (both entities included).

Both Entity A and Entity B are producers and have to report their packaging supplied to Singapore.

Company Y is **not** a producer in this case as:

- 1 They do not supply regulated goods in Singapore (19(2)(a) RSA).

Entity A is a producer and has to report packaging based on the following activities:

Table 10: Activity and Specified Packaging to be reported for Case Study 2(a)

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of regulated goods with bulk transport packaging from overseas suppliers	• Packaging of imported garments • The bulk transport packaging (e.g. crates, pallets, shrink wrap) that comes with the imported goods <u>need not</u> be reported as they are not provided to consumers (e.g. households)	19(2)

S/N	Activity	Packaging to be reported	Section of RSA
2	Purchasing of regulated goods with bulk transport packaging from local suppliers	• None • The local suppliers will be responsible for the packaging of the regulated goods unless Entity A engages the local suppliers to produce the regulated goods.	19(2)
3	Delivering of regulated goods using transport packaging to consumers and non-consumers (i.e. businesses)	• Only transport packaging used (s19(2b)) for delivery to consumers (e.g. households) needs to be reported	-

Entity B is a producer and has to report packaging based on the following activities:

Table 11: Activity and Specified Packaging to be reported for Case Study 2(b)

S/N	Activity	Packaging to be reported	Section of RSA
1	Providing carrier bags to consumers	• Carrier bags	19(2)(b)(iv)
2(a)	Delivering of regulated goods with carton boxes to households	• Carton boxes	19(2)(b)(i)
2(b)	Delivering of regulated goods with reusable crates which will be collected after delivery	• None • The crates remain in the possession of the Entity B to be re-used	19(1)

Case Study #3

Company Z imports goods from overseas suppliers on their own accord as well as on behalf of a Singapore-registered company and stores them in their warehouse located in Singapore. These goods are stored until they are either:

- Exported overseas in the same packaging the goods were imported in
- Distributed to other companies in Singapore upon purchase by other companies
- Exported for further processing/assembling and later imported back into Singapore by Company Z for supply in Singapore

Company Z is a producer and has to report packaging based on the following activities:

Table 12: Activity and Specified Packaging to be reported for Case Study 3

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of regulated goods with bulk transport packaging from overseas suppliers to be exported	• None • The exported goods are to be excluded • The bulk transport packaging (e.g. crates, pallets, shrink wrap) that comes with the imported goods <u>need not</u> be reported as they are not provided to consumers (e.g. households)	19(2)
2(a)	Importing of regulated goods with bulk transport packaging from overseas suppliers on their own accord to be supplied in Singapore	• Packaging of the imported regulated goods • The bulk transport packaging (e.g. crates, pallets, shrink wrap) that comes with the imported goods <u>need not</u> be reported as they are not provided to consumers (e.g. households)	19(2)(a)

S/N	Activity	Packaging to be reported	Section of RSA
2(b)	Importing of regulated goods with bulk transport packaging from overseas suppliers on behalf of a Singapore-connected person (e.g. a company incorporated in Singapore) to be supplied in Singapore	• None • The packaging of the imported regulated goods shall be reported by the Singapore-connected person • The bulk transport packaging (e.g. crates, pallets, shrink wrap) that comes with the imported goods <u>need not</u> be reported as they are not provided to consumers (e.g. households)	19(2)(a)
3	Exporting of regulated goods for further processing/assembling	• None • The exported goods are to be excluded	19(2)
4	Importing of regulated goods (after processing/assembling)	• Packaging of processed/assembled parts	19(2)

Case Study #4

Company T is a franchisor for a chain of fast-food restaurants. They purchase ingredients such as meat patties from both local and overseas sources. These ingredients are used to produce burgers.

Their franchisees serve their burgers within containers provided by the franchisor which are used as part of their takeaway service. The disposable cutlery used in their fast-food restaurants are individually packed with some imported from overseas and some bought from local suppliers.

Company T is a producer and has to report packaging based on the following activities:

Table 13: Activity and Specified Packaging to be reported for Case Study 4

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of ingredients from overseas suppliers to be used for production of goods	• Packaging of imported ingredients unless such packaging is excluded from the definition of specified packaging such as the bulk transport packaging (e.g. carton boxes, tubs, shrink wrap) that comes with the imported goods. These packaging <u>need not</u> be reported as long as they are not provided to consumers (e.g. households)	19(2)(a)
2	Purchasing of ingredients from local suppliers to be used for production of goods	• None • The local suppliers will be responsible for the packaging of the ingredients	19(2)

S/N	Activity	Packaging to be reported	Section of RSA
3	Providing containers imported from overseas suppliers to its franchisees and requiring the franchisees to use the containers in connection with the franchisees' supply of regulated goods	Containers provided to franchisees	19(2)(b)(iii)
4	Providing single-use cutleries with packaging imported from overseas suppliers to its franchisees	Packaging of the single-use cutleries provided to franchisees as the franchisor is the direct importer	19(2)(a)
5	Providing single-use cutleries with packaging purchased from local suppliers to its franchisees	- None - The local suppliers will be responsible for the packaging of the single-use cutleries	19(2)

Case Study #5

Company X is a caterer. The disposable cutleries, plates, cups and napkins provided to their customers for the catering are individually packed with some imported from overseas and some bought from local suppliers. Reusable stainless-steel trays are also provided during the course of their catering services and are collected after provision of the services.

Company X is a producer and has to report packaging based on the following activities:

Table 14: Activity and Specified Packaging to be reported for Case Study 5

S/N	Activity	Packaging to be reported	Section of RSA
1	Providing single-use cutleries, plates, cups and napkins with packaging imported from overseas suppliers to its customers	• Packaging of the single-use cutleries, plates, cups and napkins provided to customers as the caterer is the direct importer • Single-use plates and cups	• 19(2)(a) • 19(2)(b)(iv)
2	Providing single-use cutleries, plates, cups and napkins with packaging purchased from local suppliers to its customers	• The local suppliers will be responsible for the packaging of the single-use cutleries, plates, cups and napkins • Single-use plates and cups	• 19(2)(a) • 19(2)(b)(iv)
3	Providing reusable stainless-steel trays to contain food for catering to its customers	• None • The trays remain in the possession of the caterer to be re-used	• 19(1)

Case Study #6

Company A is a logistics provider that stores and transports goods on behalf of other companies. They have a warehouse located in Singapore which contains all the packaged goods that are stored on behalf of their customers. Company A would collect, pack and wrap these packaged goods in bulk on pallets. These pallets will be delivered upon their customer's request.

Company A is **not** a producer in this case as:

- 1 They do not supply regulated goods in Singapore (19(2)(a) RSA).

Table 15: Activity and Specified Packaging to be reported for Case Study 6

S/N	Activity	Packaging to be reported	Section of RSA
1	Delivering of regulated goods using transport packaging to businesses	• None • The bulk transport packaging (e.g. crates, pallets, shrink wrap) that comes with goods <u>need not</u> be reported as they are not provided to consumers (e.g. households)	-

Case Study #7

Company T is in the business of manufacturing packaging and is contracted by Company Z registered in Singapore to produce packaging for its goods. Company T imports the raw materials used as infeed for the manufacturing of the packaging which is done in Singapore. Company T then fills these packaging with the goods of Company Z. Thereafter, the packaged goods are sent to Company Z to be sold locally.

Both Company T and Company Z are producers and have to report on their packaging supplied to Singapore.

Company T is a producer and has to report packaging based on the following activity:

Table 16: Activity and Specified Packaging to be reported for Case Study 7(a)

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of raw materials for the manufacture of packaging	Packaging of imported raw materials unless such packaging are excluded from the definition of specified packaging such as the bulk transport packaging (e.g. carton boxes, crates, tubs, pallets, shrink wrap, sacks) that comes with the imported goods. These packaging <u>need not</u> be reported as long as they are not provided to consumers (e.g. households)	19(2)(a)

Company Z is a producer and has to report packaging based on the following activity:

Table 17: Activity and Specified Packaging to be reported for Case Study 7(b)

S/N	Activity	Packaging to be reported	Section of RSA
1	Filling of goods into the packaging	Packaging of the goods will be reported by Company Z as it engages Company T to fill its goods into the packaging	19(2)(b)(ii)

Case Study #8

Company G is a manufacturer of packaged beverage goods. The raw materials and packaging used to produce their packaged goods are imported into Singapore. The raw materials are stored in both ISO tanks and bulk bags which remain in their possession. Company G also conducts product samplings where they use disposable cups bought from local suppliers to serve their goods to business clients. Their packaged beverage goods are mostly exported with a small percentage supplied in Singapore.

Company G is a producer and has to report packaging based on the following activities:

Table 18: Activity and Specified Packaging to be reported for Case Study 8

S/N	Activity	Packaging to be reported	Section of RSA
1	Importing of raw materials for the manufacture of goods	• Packaging of imported raw materials unless such packaging are excluded from the definition of specified packaging such as the bulk transport packaging (e.g. carton boxes, crates, tubs, pallets, shrink wrap, sacks) that comes with the imported goods. These packaging <u>need not</u> be reported as they are not provided to consumers (e.g. households)	19(2)(a)
2	Importing of packaging to pack the goods	• Packaging of the packaging	19(2)(a)
3	Storing of raw materials in ISO tanks and bulk bags	• None • The ISO tanks and bulk bags remain in the possession of the beverage manufacturer to be re-used	19(1)

S/N	Activity	Packaging to be reported	Section of RSA
4	Providing disposable cups bought from local suppliers to business clients for product sampling	• Disposable cups • Packaging of the disposable cups will be reported by the local suppliers	19(2)(b)(iv)
5	Manufacturing of packaged goods	• Packaging of the goods supplied to the local market (regardless of sales volume)	19(2)(b)(i)

Mandatory Packaging Reporting (MPR) Submission Portal Interface Guide

What Will You Need

- ✓ A computer with internet access.

- ✓ Before accessing the Mandatory Packaging Reporting Submission portal, please ensure that you have a valid Singpass and have been assigned access to NEA's Digital Services called "NEA Waste and Resource Management System". Your company CorpPass Admin can set up the digital services under Entity's Digital Services in CorpPass.

IMPORTANT NOTE!

For information on CorpPass, please access <https://www.corppass.gov.sg>.

Additional Notes

- ✓ To reduce the time required to perform the submission, please prepare the following documents:

- Filled Packaging Data Excel Reporting Template for submission

Note:

The Packaging Data Excel Reporting Template can be downloaded from NEA MPR website at <https://www.nea.gov.sg/packaging> and/or within the portal.

- Methodology Document
- List of Brand Names/Franchise Brand Names (if relevant)

- ✓ Your company will receive an email notification upon registration, submission, and acceptance of submission.

Role and Rights

Getting Started

1.1 How to access NEA's Mandatory Packaging Reporting Portal

- a Ensure that your computer has internet access.
- b Launch your web browser (e.g. Internet Explorer 11 and higher, Firefox 52 and higher, Chrome 56 and higher, etc.) and access the WRMS home page through: <https://wrms2.nea.gov.sg>.
- c Click on “Mandatory Packaging Reporting (MPR)” as shown in **Figure 1.1.1: Mandatory Packaging Reporting (MPR)**.

Figure 1.1.1: Mandatory Packaging Reporting (MPR)

d

Click on 'Login' to proceed

Figure 1.1.2: Singpass Login Page

e

If this is your first time logging into the portal, refer to part a. Otherwise, please refer to part b.

a) The screen will show the Registration for Mandatory Packaging Reporting Page as shown in **Figure 1.1.3: Registration for Mandatory Packaging Reporting**.

Figure 1.1.3: Registration for Mandatory Packaging Reporting

OR

b) The screen will show the MPR Rep “Dashboard” as shown in **Figure 1.1.4: MPR Rep Dashboard** below.

Figure 1.1.4:
MPR Rep Dashboard

The screenshot displays the 'Waste and Resource Management System (WRMS)' dashboard for MPR Rep. It features two main sections: 'Pending Submission' and 'Past Submission', each with a table of submission details. Red circles with numbers 1 and 2 highlight these sections respectively.

Pending Submission					
No.	Name of Submission (s)	Reporting Period (s)	Submission Deadline (s)	Status (s)	Action
1	Mandatory Packaging Report	01-01-2015 to 01-03-2015	31-03-2015	Pending Submission	Edit View

Past Submission					
No.	Submission No. (s)	Reporting Period (s)	Submission Deadline (s)	Status (s)	Action
1	MPR-S-2015-0000079	01-01-2015 to 01-03-2015	31-03-2015	SUBMITTED	Edit View

In the dashboard, there are two sections:

- 1 Pending Submission: Lists submissions that have yet to be submitted by your company.
- 2 Past Submission: Lists all previous submissions made by your company.

1.2 How to log out of the Reporting Portal

- a Click on the 'Logout' button at the top right corner to exit the service as shown in **Figure 1.2.1: Logout Button**. You will return to the WRMS home page.

Figure 1.2.1:
Logout Button

The screenshot shows the Waste and Resource Management System (WRMS) interface. At the top, there is a header with the National Environment Agency logo and the Singapore Government logo. The main title is 'Waste and Resource Management System (WRMS)'. On the right side of the header, there is a 'Logout' button highlighted with a red box. Below the header, there is a navigation bar with four steps: 1. Prerequisite, 2. Registration, 3. Confirmation, and 4. Acknowledgement. The 'Prerequisite' step is currently selected. The main content area is titled 'Registration for Mandatory Packaging Reporting'. It contains a form with two radio buttons: 'My company's annual turnover is more than \$10 million.' and 'My company's annual turnover is less than \$10 million.'. Below these radio buttons, there is a text input field for 'Please indicate your company's annual turnover for the year of 2018 (01 January 2018 to 31 December 2018)' with a value of 'e.g. 30' and a unit of 'millions'. At the bottom of the form, there is a checkbox for 'I declare that the information provided above is true and complete. Under the Resource Sustainability Act, there are penalties for making a false or incorrect declaration.' and two buttons: 'Clear' and 'Next'.

1.3 Registration

- a There are 2 radio buttons in the Prerequisite Form: one to declare that the company's annual turnover is more than S\$10 million, and one to declare that the company's annual turnover is less than S\$10 million. These 2 radio buttons will hide or unhide certain textboxes. Select the radio button that is valid for the company you are registering and submitting on behalf of.
- 1 Companies with an annual turnover of above S\$10 million are required to declare their Annual Turnover (in millions) as shown in **Figure 1.3.1: Prerequisite (Above 10 million)**.

Registration for Mandatory Packaging Reporting

All fields with "*" are compulsory.
According to Part 4 - Reporting in Relation to Packaging of the Resource Sustainability Act, producers who fulfil the prescribed threshold criteria must submit annually to the Agency (i) a report relating to the specified packaging that is imported or used and (ii) a plan to reduce, re-use or recycle packaging in Singapore.

1 Prerequisite 2 Registration 3 Confirmation 4 Acknowledgement

Prerequisite

My company's annual turnover is more than \$10 million.* ☒ Yes ☐ No

Please indicate your company's annual turnover for the year of 2018 (01 January 2018 to 31 December 2018): e.g. 30 millions

☐ I declare that the information provided above is true and complete. Under the Resource Sustainability Act, there are penalties for making a false or incorrect declaration.

Clear Next

- 2 Enter the Annual Turnover Amount (in millions).
- 3 a) Click on the 'Next' button to proceed.
b) By clicking the 'Clear' button. A pop-up will appear for your confirmation to clear all fields as shown in **Figure 1.3.2: Clear Data Confirmation**. Click 'Yes' to continue clearing the fields. Click 'No' to cancel clearing all the fields.

Figure 1.3.2: Clear Data Confirmation

Are you sure you want to clear all the fields you have filled in so far? X

Yes No

- 4 In this section, you may enter your “Company Details”, “Primary Contact Information”, and “Secondary Contact Information”. The “Singapore Registered Company Address” will be filled in automatically with information from ACRA as shown in **Figure 1.3.3: Registration for MPR (1)**, **Figure 1.3.4: Registration for MPR (2)**, **Figure 1.3.5: Registration for MPR (3)**.

Note:

If the information in the ACRA database is not updated, the information used to automatically fill the fields will be incorrect as well. Please update the information in ACRA before continuing.

- 5 Fill in the fields for under Company Details, and Primary Contact Information, and Secondary Contact Information. Do note that in **Figure 1.3.3: Registration for MPR (1)** and **Figure 1.3.4: Registration for MPR (2)**, the fields highlighted in red boxes are automatically filled with information from ACRA.
- 6 By selecting ‘Yes’ in the red box in **Figure 1.3.5: Registration for MPR (3)**, you consent to being served any documents relevant to the MPR only through email. No hardcopy documents will be served.
- 7
 - a) Click on the ‘Save Draft’ Button to save the information that has been filled in.
OR
 - b) Click on the ‘Back’ button. A pop-up will appear for your confirmation to return to Prerequisite page as shown in **Figure 1.3.6: Confirmation to Return to Prerequisite**. Click ‘Confirm’ to return to the previous page. Click ‘Cancel’ to cancel this action.
OR
 - c) Click on the ‘Next’ button to continue with the registration process

Upon clicking the 'Submit' button, you will be led to an acknowledgement page, as shown in **Figure 1.3.11: Registration Acknowledgement**. This means that you have successfully registered the company you are representing for the MPR. Now, the Left Menu Panel should have 2 new options: "Submit MPR" and "Update Company Details".

a) Click on the 'Back to Dashboard' button to be directed to the Dashboard Page.

i) Alternatively, you may click 'Submit MPR' at the Left Menu Panel.

b) Click on the 'Print Acknowledgement' button to print a copy of the acknowledgement.

Figure 1.3.11: Registration Acknowledgement

1.4 Navigating the system

- 1 You may access two sections through the left menu panel: “Submit MPR”, and “Update Company Details”.
 - The ‘Submit MPR’ button leads to the Dashboard that provides an overview of all submissions.
 - The ‘Update Company Details’ button enables you to view and edit your registered company’s information.
- 2 Both sections can be accessed through the appropriate header in the left menu panel, as shown in **Figure 1.4.1: Left Menu Panel**.

Figure 1.4.1:
Left Menu Panel

2 Submission of MPR

2.1 Navigating the dashboard

- 1 The dashboard provides an overview of all submission-related matters.
- 2 Under the “Pending Submission” section, the yearly reporting that is open for submission but have yet to be submitted by your company will be listed as shown in **Figure 2.1.1: Pending Submission Section.**

Figure 2.1.1: Pending Submission Section

- 3 All previous submissions will be listed under the “Past Submission” section as shown in **Figure 2.1.2: Past Submission Section**.
- After submission, records from the “Pending Submission” section will be reflected under this section.

Figure 2.1.2: Past Submission Section

The screenshot displays the Waste and Resource Management System (WRMS) dashboard. The header includes the National Environment Agency logo and the Singapore Government logo. The dashboard title is "Waste and Resource Management System (WRMS)". The main content area is titled "Dashboard" and "Submission for Mandatory Packaging Reporting". It features two tables: "Pending Submissions" and "Past Submission". The "Past Submission" table is highlighted with a red border. The footer contains links for "Report Vulnerability", "Privacy Statement", "Terms of Use", "Open Data Licence", and "Make our Website".

No.	Name of Submission	Reporting Period	Submission Deadline	Status	Action
1	Mandatory Packaging Report	01-01-2019 to 31-03-2019	31-03-2019	Pending Submission	

No.	Submission No.	Reporting Period	Submission Deadline	Status	Action
1	MPR-S/2019-0000071	01-01-2019 to 31-03-2019	31-03-2019	Submitted	

2.2 How to submit MPR

Companies are required to submit the required reports annually as long as they meet the reporting requirements. Please ensure that a new Packaging Data Excel Reporting Template is used for each annual submission.

- a To begin submission, click on the 'Edit' button in the "Pending Submission" section as shown in **Figure 2.2.1: Edit Pending Submission Dashboard**. You will be brought to the "Download Template" page as shown in **Figure 2.2.2: Download Template Page**.
- b You may click on the 'Download Packaging Data Template' hyperlink to download a copy of the Packaging Data Excel Reporting Template, as shown in **Figure 2.2.2: Download Template Page** point 1.
- c Fill the Packaging Data Excel Reporting Template with the data required for submission if you have not done so.
- d Review the Terms & Conditions and ensure that you understand and agree to them. Check the checkbox as shown in **Figure 2.2.2: Download Template Page** point 2. After the checkbox has been selected, the 'Next' button will be enabled.

Figure 2.2.1: Edit Pending Submission Dashboard

Figure 2.2.2: Download Template Page

e Click on the 'Next' button to proceed. You will be brought to the "Upload Submission" page as shown in **Figure 2.2.3: Upload Submission Page (1)** and **Figure 2.2.4: Upload Submission Page (2)**.

The “Confirmation” page shows all the information that was entered in the previous pages before fully submitting the submission. You can download the attached files individually for review, or download the whole submission, as shown in **Figure 2.3.6: Submission Confirmation Page (2)**. The 3R Plans will be displayed in an excel format.

Figure 2.3.5: Submission Confirmation Page

The screenshot displays the 'Mandatory Packaging Reporting' interface. At the top, there's a progress bar with four steps: 'Download Template', 'Upload Submissions', 'Confirmation' (the current step), and 'Acknowledgement'. The 'Confirmation' step is highlighted in green.

Under 'Packaging Data', there's a 'Submission Details' section with links to download files: 'PackagingDataTemplate.xlsx', 'test.pdf', 'List of Brand Names / Franchise Brand Names', and 'Other Supporting Documents'.

Below this is the '3R Plans for Packaging' section, which contains a table with the following data:

No.	Type of Improvement Plan	Brief Description of Improvement Plan	KPI	KPI Target	Target Completion Date	Plan Status
1	Consumer Outreach related to Packaging 3Rs	Test Brief Description of Improvement Plan 1	Percentage increase in recycled content (unit = %)	92	02/01/2021	Pending submission

At the bottom of the page, there is a button labeled 'Download Entire Submission as ZIP file'.

☐ I confirm that the information entered are accurate and understand that failure to comply with the Resource Sustainability Act, Part 4 - REPORTING IN RELATION TO PACKAGING could result in enforcement action taken against my company. ✕

[Submit](#)

- h Upon clicking the 'Submit' Button, you will be directed to the "Acknowledgement" Page, as shown in **Figure 2.3.8: Submission Acknowledgement Page**. An email notification will be sent to you upon submission. To print this page, click the 'Print Acknowledgement' Button. To return to the submission dashboard, click the 'Back to Dashboard' Button.

Figure 2.3.8: Submission Acknowledgement Page

- i If resubmission is successful, the status of the submission record will be changed to "Submitted" as shown in **Figure 2.3.9: Submitted Status for Resubmission**. If there are still errors in the report, the status will remain as "Validation Fail" under the "Pending Submission" section as shown in **Figure 2.3.10: Validation Fail Status for Resubmission**. Please revisit **Section 2.3** if the status remains as "Validation Fail".

2.4 How to make a resubmission if submission is returned by NEA

NEA will review the submission once it is successful. NEA will return the submission if there are any clarifications required and the status of the submission will be indicated as “Returned for Resubmission”. An email notification will also be sent to remind you to resubmit the submission.

- a Scroll to the Pending Submission section of the Dashboard as shown in **Figure 2.4.1: Pending Submission Section**
- a) Identify the record that reflects “Returned for Resubmission” and click on the Edit Details icon 

Figure 2.4.1: Pending Submission Section

Pending Submission					
No.	Name of Submission	Reporting Period	Submission Deadline	Status	Action
1	MPR-S-2019-0000048	01-01-2019 to 31-01-2020	31-03-2020	Returned for Resubmission	

- b You will be redirected to the Download Template Page. This will allow you to download a new Packaging Data Excel Reporting Template.
- c Check on the checkbox and click on the ‘Next’ button.

d

The screen will show the Upload Submissions Page as shown in **Figure 2.4.2: Upload Submissions Page**.

Figure 2.4.2:
Upload Submissions Page

The screenshot shows the 'Mandatory Packaging Reporting' section of the WRMS. It includes a progress bar with four steps: 1. Download Template, 2. Upload Submissions (active), 3. Confirmation, and 4. Acknowledgement. The 'Packaging Data' section contains 'Submission Details' with fields for 'Packaging Data', 'Methodology Document', and 'List of Brand Names / Franchise Brand Names'. Each field has a 'Choose File' button and a 'Drop File here' area. The 'Packaging Data' field shows a validation message: 'PackagingDataTemplate - Validation OK.xlsx'. The 'Methodology Document' field shows a file name: 'PMT7TEST.pdf'. The 'List of Brand Names / Franchise Brand Names' field is empty. Below these fields, there is a section for 'Other supporting documents' with similar 'Choose File' and 'Drop File here' options. The allowed file types are listed as pdf, doc, docx, xls, xlsx, ppt, pptx, jpg, png, gif, zip, and the maximum upload file size is 10MB.

e

Click on the file hyperlinks to download the previous submission files as shown in **Figure 2.4.2: Upload Submissions Page**. View NEA comments under Officer Remark and amend/update the submission if required as shown in **Figure 2.4.3: Officer Remarks**.

Figure 2.4.3:
Officer Remarks

The screenshot shows the 'Officer Remarks' section of the WRMS. It includes a table titled '3R Plans for Packaging' with columns: No., Type of Improvement Plan, Brief Description of Improvement Plan, KPI, KPI Target, Target Completion Date, Plan Status, and Action. The table contains one row with the following data: No. 1, Type of Improvement Plan: Packaging Collection for Recycling, Brief Description of Improvement Plan: Increase Recycling initiative in Wasted Packaging, KPI: Amount of packaging recycled per firm/company annual turnover (unit = kg/firm), KPI Target: 0.02, Target Completion Date: 01 Oct 2021, Plan Status: In-Progress, and Action: [icon]. Below the table, there is a legend with icons for Edit and Remove, and an 'Add Plan' button. The 'Remarks' section includes a text area for 'NEA's Remarks' with the text 'Test Save Draft Status for return to resubmission', a text area for 'Your Response', and a 'Remarks Field' section with 'Back', 'Clear', and 'Next' buttons.

- f Add your remarks to inform NEA of the changes to the submission you have made.
- g Upload the amended Packaging Data Excel Reporting Template, Methodology Document File, List of Brand Names/Franchise Names file (if relevant) and Other Supporting Documents, if required, as shown in **Figure 2.4.2: Upload Submissions Page**.
- h Click on the 'Next' button to continue to the "Confirmation" Page.
- i Verify the data that was input, and the files were uploaded from the previous page.
- a) Click on the 'Back' button if you would like to amend any data that was input or file that was uploaded.
- b) Click on the 'Submit' button to continue with the submission.
- i) A pop-up will appear. Check the checkbox and click on the 'Submit' button to continue.
- j You will reach the acknowledgement page, as shown in **Figure 2.4.4: Resubmission Acknowledgement Page**.

Figure 2.4.4: Resubmission Acknowledgement Page

k

If resubmission is successful, the status of the submission will be changed to “Submitted” as shown in **Figure 2.4.5: Submitted Status (After Resubmission)**.

2.5 How to view a submission

This section illustrates how to view your submission. The steps for this section apply to all submission status.

a

Locate the submission that you would like to view.

b

Click on the ‘View’ Icon  , as shown in **Figure 2.5.1: View Submission**.

Figure 2.5.1: View Submission

The screenshot shows the WRMS dashboard with a 'Past Submission' table. The table has columns: No., Submission No., Reporting Period, Submission Deadline, Status, and Action. The first row shows submission No. 1, Submission No. MPR-S-2019-0000048, Reporting Period 01-01-2019 to 31-01-2020, Submission Deadline 31-03-2020, and Status Submitted. The Action column contains a 'View' icon (a magnifying glass) which is highlighted with a red box.

C

You will be directed to the “Confirmation Page”, as shown in **Figure 2.5.2: View Submission Confirmation Page**. This page allows you to view the data you submitted, download the individual attached files, as shown in point 1, and/or download the submission as a whole, as shown in point 2.

3 Management of company information

This section illustrates how to view and edit your company information, such as address and contact details.

3.1 How to view and edit my company's information

- a Click on the 'Update Company Details' button on the left menu panel as shown in **Figure 3.1.1 Update Company Details**, highlighted in the red box.

Figure 3.1.1: Update Company Details

- b You will be brought to the “Prerequisite” page as shown in **Figure 3.1.2: Manage Prerequisite**.

Figure 3.1.2:
Manage Prerequisite

The screenshot shows the 'Prerequisite' page within the Waste and Resource Management System (WRMS). The page title is 'Registration for Mandatory Packaging Reporting'. It includes a progress bar with four steps: Prerequisite (active), Registration, Confirmation, and Acknowledgement. The 'Prerequisite' section contains a form with the following fields and options:

- A radio button selection for 'My company's annual turnover is more than \$10 million *' with options 'Yes' and 'No'.
- A text input field for 'Please indicate your company's annual turnover for the year of 2018 (01 January 2018 to 31 December 2018) *' with the value '10.1' entered and a unit dropdown set to 'millions'.
- A checkbox for 'I declare that the information provided above is true and complete. Under the Resource Sustainability Act, there are penalties for making a false or incorrect declaration.*'
- 'Clear' and 'Next' buttons at the bottom of the form.

The page also features a left sidebar with navigation links (VMS, Submit MPR, Monitor Company Details), a top navigation bar with the Singapore Government logo and links (Who we are, Contact us, Feedback, Login), and a footer with social media links and app download instructions.

- c In this section, you could update your company's annual turnover if you have previously entered an incorrect value.
- d Click on the 'Next' button to proceed to the next section.

e You will be brought to the Registration page where you can view and edit your company's information as shown in **Figure 3.1.3: View & Edit Company Details (1)**, **Figure 3.1.4: View & Edit Company Details (2)**, **Figure 3.1.5: View & Edit Company Details (3)**. Fields under "Singapore Registered Company Address" cannot be amended unless it has been updated in ACRA. The fields would have been filled in with the information previously specified during registration or your previous edit.

- a) Only "Industry Classifications" and "Contact Details" can be amended.
- b) UEN cannot be amended.

Figure 3.1.3: View & Edit Company Details (1)

The screenshot displays the 'Company Details' page within the Waste and Resource Management System (WRMS). The page is divided into two main sections: 'Company Details' and 'Singapore Registered Company Address'. The 'Company Details' section includes fields for UEN (188700000K), Main Industry Classification (Manufacturing), Sub-Industry Classification (Food & Beverage), and a list of roles (Brand Owner, Franchisor, Franchisee, Licensee, Contracted Importer, NA) with 'Licensee' selected. The 'Singapore Registered Company Address' section includes fields for Postal Code (120456), Block Number (12), Street Name (Extended Road), Building Name (Extended Building), Floor (1), and Unit No. (2). A note at the bottom states: 'Note: The information in these fields were auto filled based on the information on the ACRA database. If the information displayed is incorrect, please update the information on ACRA.'
